PREAMBLE

PRINCIPLES OF MEDICAL NECESSITY DETERMINATIONS

Magellan Behavioral Health of Florida has the belief that every enrollee is capable of recovery and resiliency. Magellan endeavors to promote care which is increasingly individualized, in which enrollees and their families are empowered to achieve their goals, and in which all enrollees maximize their opportunities to live full lives in their own communities.

Magellan's care managers are available to assist enrollees and their families 24 hours/day and 365 days per year. Providing oversight and support to our care managers are our Care Management Center medical directors and our physician advisors: all Board-certified psychiatrists. This rich resource of psychiatric support allows enrollees to have access to professionals who are knowledgeable about evidence-based practices and are effective in making medical necessity determinations.

Magellan is committed to the philosophy of providing treatment at the most appropriate and least restrictive level of care necessary for effective and efficient treatment to meet the enrollee's biopsychosocial needs. We see the continuum of care as a fluid treatment pathway, where enrollees may enter treatment at any level and be moved to more or less intensive levels of care as their changing clinical needs dictate. At any level of care, such treatment should be individualized and should take into consideration the enrollee's stage of readiness to change and participate in treatment.

The Magellan Medical Necessity Criteria guide both providers and reviewers to the most appropriate level of care for an enrollee. While these criteria will assign the most effective and least restrictive level of care in nearly all instances, an infrequent number of cases may fall beyond their definition and scope. Thorough and careful review of each case, including consultation with supervising clinicians, will identify these exceptions. As in the review of other cases, clinical judgment consistent with the standards of good medical practice will be used in making medical necessity determinations.

Medical necessity decisions about each enrollee are based on the clinical information provided by the treating practitioner or facility, the application of the medical necessity criteria and available treatment resources. We recognize that a full array of services is not available everywhere. When a medically necessary level of care does not exist or is not available, we will authorize a higher than otherwise necessary level of care so that services are available that will meet the enrollee's essential needs for effective treatment.

DEFINITION OF MEDICALLY NECESSARY

In accordance with 59G-1.010 (166) Florida Administrative Code, medically necessary means that:

1. The medical or allied care, goods, or services furnished or ordered must meet the following conditions:

Be necessary to protect life, to prevent significant illness or significant disability, or to alleviate severe pain;

Be individualized, specific, and consistent with symptoms or confirmed diagnosis of the illness or injury under treatment, and not in excess of the enrollee's needs;

Be consistent with generally accepted professional medical standards as determined by the Medicaid program, and not experimental or investigational;

Be reflective of the level of service that can be safely furnished, and for which no equally effective and more conservative or less costly treatment is available statewide; and

Be furnished in a manner not primarily intended for the convenience of the enrollee, the enrollee's caretaker, or the provider.

2. "Medically necessary" or "medical necessity" for hospital services requires that those services furnished on an inpatient basis could not, consistent with the provisions of appropriate medical care, be effectively furnished on an outpatient basis.

3. The fact that a provider has prescribed, recommended, or approved medical or allied goods, or services does not, in and of itself, make such care, goods or services medically necessary or a medical necessity or a covered service.

I. INPATIENT HOSPITAL SERVICES, PSYCHIATRIC

a. Adult

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Inpatient Services are intensive, twenty-four hour services, occurring in an appropriately licensed mental health facility. Services are provided under the supervision of a licensed psychiatrist and are focused on reducing immediate risk due to dangerousness to self or others, grave disability, or complicating medical conditions (coexisting with a mental health condition) that leave the enrollee at significant risk. Treatment is highly intensive, and is provided in a secure environment by a multidisciplinary team of qualified mental health professionals.</p> <p>Common Settings:</p> <ul style="list-style-type: none"> Inpatient Unit <p>Alternative Setting:</p> <ul style="list-style-type: none"> Crisis Stabilization Unit-- this can substitute for inpatient as a downward substitution on a 2 day for 1 ratio when medically appropriate. 	<p>Magellan - Setting and Admission Components</p> <p>This is the most intensive and restrictive level of care. It allows for interventions requiring a very high frequency of services, 24-hour professional monitoring, supervision and assistance. There is a very high degree of assurance of safety and security. There is availability and intensity of programs, which include more than once daily interventions requiring on-site professional and technical support.</p> <p>Inpatient treatment also provides on-site medical and nursing services for enrollees at high risk of medical/surgical complications affecting or affected by psychiatric interventions or procedures.</p> <p>Admission Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> Professional staff consisting of a multidisciplinary treatment team to include: <ul style="list-style-type: none"> An attending psychiatrist, preferably Board certified; Registered nurses; Psychologists, social workers, educational specialists, or other mental health professionals and ancillary staff available when clinically indicated. An Individualized, treatment plan which incorporates the enrollee's strengths and is directed toward 	<p>Admission Criteria (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> Validated principal ICD-9-CM diagnosis on Axis I or II as part of a complete multi-axial diagnostic evaluation. This diagnosis must be one of the following ICD-9-CM codes: 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9. Treatment at a less intensive and restrictive level of care has been attempted <u>or</u> given serious consideration and is not clinically appropriate. Level of stability - (Must meet one of the following). Dangerousness must be a direct product of the principal DSM- IV-TR Axis I or II diagnosis for the following levels of stability (e.g., dangerousness to self/others/property is due to the enrollee's mental health condition): <ol style="list-style-type: none"> Loss of ability to perform activities of daily living due to severely impaired judgment, lack of impulse control or cognitive/perceptual abilities arising from: <ul style="list-style-type: none"> a psychiatric condition or a serious emotional disturbance; or an exacerbation of a chronic psychiatric condition; or a significant decrease in functioning as measured against baseline functioning over the preceding year. <p>OR</p> <ol style="list-style-type: none"> Danger to self as evidenced by: <ul style="list-style-type: none"> a significant life-threatening action and/or current risk; or a specific plan to harm self with clear intention, high lethality and availability of means; or a level of suicidality that cannot be safely managed at a less intensive and restrictive level of care; or dangerousness to self accompanied by a rejection of or lack of available social/therapeutic support. <p>OR</p> <ol style="list-style-type: none"> Danger to others as evidenced by: <ul style="list-style-type: none"> a significant life-threatening action and/or current risk; or a specific plan with clear intention, high lethality and availability of means; or dangerousness to others accompanied by a rejection of or lack of available social/therapeutic support. <p>OR</p>

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	<p>the alleviation of the impairment that caused the admission. This must be completed by the third day of inpatient care and is planned within the context of a highly structured program of care that is based upon a comprehensive assessment, including the possibility of substance abuse.</p> <ol style="list-style-type: none"> 3. Clinical interventions consistent with enrollee's risk of harm to self, others or property. 4. Discharge planning must be initiated at time of admission 5. Availability of appropriate medical services. 6. Enrollee receiving psycho-educational assessment and services, if clinically indicated. 7. Family system receiving evaluation and intervention to the extent possible. <p>Continued Stay Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. The initial discharge plan has been formulated and is in the process of implementation. 2. Active and timely treatment is focused upon stabilizing or reversing symptoms necessitating admission. 3. Level of clinical intervention is consistent with current enrollee risk factors. 4. The treatment plan is frequently modified to reflect the enrollee's progress and/or new information that has become available during the inpatient stay. 	<ol style="list-style-type: none"> d. Danger to property where such danger includes: <ul style="list-style-type: none"> a recent and significant action and/or current risk; or a specific plan with clear intention, high lethality and availability of means; or dangerousness to property accompanied by a rejection of or lack of available social/therapeutic support. <p>OR</p> <ol style="list-style-type: none"> e. A co-existing medical/substance abuse condition that would complicate or interfere with the treatment of the psychiatric disorder at a less intensive and restrictive level of care. <p>OR</p> <ol style="list-style-type: none"> f. A high-risk psychiatric procedure that requires intensive monitoring by medical personnel. <ol style="list-style-type: none"> 4. Degree of Impairment - (Must meet a, and either b or c) <ol style="list-style-type: none"> a. Enrollee has insufficient or severely limited resources or skills necessary to maintain an adequate level of functioning outside of the inpatient setting and has impaired judgment, lack of impulse control and/or cognitive/perceptual abilities arising from a psychiatric disorder, a serious emotional disturbance, or an exacerbation of a chronic psychiatric condition which may indicate the need for the continuous monitoring and intervention of a inpatient treatment in order to stabilize or reverse the dysfunction. b. Social/Interpersonal/Familial – Enrollee has significantly impaired interpersonal, social or familial functioning arising from a psychiatric disorder, a serious emotional disturbance, or an exacerbation of a chronic psychiatric condition which may indicate the need for inpatient treatment to achieve or resume an adequate level of functioning. c. Educational/Occupational – Enrollee has significantly impaired educational or occupational functioning arising from a psychiatric disorder, a serious emotional disturbance, or an exacerbation of a chronic psychiatric condition which may indicate the need for inpatient treatment to achieve or resume an adequate level of functioning. <p>Continued Stay Criteria (Must meet 1, 2, 3 and either 4 or 5)</p> <ol style="list-style-type: none"> 1. An ICD-9-CM diagnosis which remains the principal diagnosis. This diagnosis must continue to be from the following list: 290.0-290.43, 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 2. The reasonable likelihood of substantial benefit as a result of active and timely medical intervention which necessitates the inpatient treatment setting. Active medical intervention includes: <ul style="list-style-type: none"> • a physical examination which is conducted within 24 hours of admission; • a psychiatrist conducts a psychiatric examination (including the Mental Status Exam) which occurs within 24 hours of admission; and

Magellan Utilization Management Guidelines

2. An Individualized, treatment plan which incorporates the enrollee's strengths and is directed toward the alleviation of the impairment that caused the admission. This must be completed by the third day of inpatient care and is planned within the context of a highly structured program of care that is based upon a comprehensive assessment, including the possibility of substance abuse. Treatment is performed on a unit dedicated to child or adolescent populations whenever possible.
 3. Clinical interventions are consistent with enrollee's risk of harm to self, others or property.
 4. Discharge planning must be initiated at time of admission
 5. Availability of appropriate medical services.
 6. Enrollee receiving psycho-educational assessment and services, if clinically indicated.
 7. Family system including parents/guardians and other caretakers receiving evaluation and intervention to the extent possible.
- Continued Stay Service Components (Must meet *all* of the following)**
1. The initial discharge plan has been formulated and is in the process of implementation.
 2. Active and timely treatment is focused upon stabilizing or reversing symptoms necessitating admission.
 3. Level of clinical intervention is consistent with current enrollee risk

- OR**
- d. Danger to property where such danger includes:
a recent and significant action and/or current risk; or
a specific plan with clear intention, high lethality and availability of means; or
dangerousness to property accompanied by a rejection of or lack of available social/therapeutic support.
- OR**
- e. A co-existing medical/substance abuse condition that would complicate or interfere with the treatment of the psychiatric disorder at a less intensive and restrictive level of care.
- OR**
- f. A high-risk psychiatric procedure that requires intensive monitoring by medical personnel.
4. Degree of Impairment - (Must meet a, and either b or c)
- a. Enrollee has insufficient or severely limited resources or skills necessary to maintain an adequate level of functioning outside of the inpatient setting and has impaired judgment, lack of impulse control and/or cognitive/perceptual abilities arising from a psychiatric disorder, a serious emotional disturbance, or an exacerbation of a chronic psychiatric condition which may indicate the need for the continuous monitoring and intervention of a inpatient treatment in order to stabilize or reverse the dysfunction.
 - b. Social/Interpersonal/Familial – Enrollee has significantly impaired interpersonal, social or familial functioning arising from a psychiatric disorder, a serious emotional disturbance, or an exacerbation of a chronic psychiatric condition which may indicate the need for inpatient treatment to achieve or resume an adequate level of functioning.
 - c. Educational/Occupational – Enrollee has significantly impaired educational or occupational functioning arising from a psychiatric disorder, a serious emotional disturbance, or an exacerbation of a chronic psychiatric condition which may indicate the need for inpatient treatment to achieve or resume an adequate level of functioning.
- Continued Stay Criteria (Must meet 1, 2, 3 and either 4 or 5)**
1. An ICD-9-CM diagnosis which remains the principal diagnosis. This diagnosis must continue to be from the following list: :293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9.
 2. The reasonable likelihood of substantial benefit as a result of active and timely medical intervention which necessitates the inpatient treatment setting. Active medical intervention includes:
 - a physical examination which is conducted within 24 hours of admission;
 - a psychiatrist conducts a psychiatric examination (including the Mental Status Exam) which occurs

Clinical interventions consistent with enrollee's risk of harm to self, others or property. 4. Discharge planning must be initiated at time of admission 5. Availability of appropriate medical services. 6. Enrollee receiving psycho-educational assessment and services, if clinically indicated. 7. Family system receiving evaluation and intervention to the extent possible. <p>Continued Stay Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. The initial discharge plan has been formulated and is in the process of implementation. 2. Active and timely treatment is focused upon stabilizing or reversing symptoms necessitating admission. 3. Level of clinical intervention is consistent with current enrollee risk factors. 4. The treatment plan is frequently modified to reflect the enrollee's progress and/or new information that has become available during the inpatient stay. 5. Daily assessments and active interventions are completed by nurses or other mental health professionals, and physician services are provided daily. All interventions and assessments are based upon the enrollee's comprehensive treatment plan. 6. The enrollee and family, to the extent possible, are involved in treatment and 	<ol style="list-style-type: none"> a. be in treatment that, at a minimum, consists of treatment several times per week with twice weekly individual and/or family therapy, either professional group therapy or self-help group involvement, nutritional counseling, and medication if indicated, and b. have significant weight loss (<85% IBW), and c. have significant impairment in social or occupational functioning, and d. be uncooperative with treatment (or cooperative only in a highly structured environment) despite having insight and motivation to recover, and e. require changes in the treatment plan that cannot be implemented in a less intensive setting. <p>Continued Stay Criteria (Must meet Criteria 1 and 2, and either 3, 4, 5 or 6)</p> <ol style="list-style-type: none"> 1. The reasonable likelihood of substantial benefit as a result of active and timely medical intervention which necessitates the inpatient treatment setting. Active medical intervention includes: <ul style="list-style-type: none"> • a physical examination which is conducted within 24 hours of admission; • a psychiatrist conducts a psychiatric examination (including the Mental Status Exam) which occurs within 24 hours of admission; and • treatment planning and subsequent therapeutic orders reflect appropriate, adequate and timely implementation of all treatment approaches in response to the enrollee's changing needs. 2. Enrollee and family, to the extent possible, are involved in the enrollee's treatment and discharge planning. 3. Continuation of symptoms and/or behaviors that met medical necessity criteria for admission (and continue to meet medical necessity criteria for admission), or a less intensive level of care would be insufficient to stabilize the enrollee's condition or, 4. The enrollee's weight remains <85% of IBW and he/she fails to achieve a reasonable and expected weight gain despite provision of adequate caloric intake. 5. There is a continued inability to adhere to a meal plan and maintain control over urges to binge/purge such that continued supervision during and after meals and/or in bathrooms is required. In order to satisfy this criterion, there must be evidence that the enrollee is unable to participate in ambulatory or residential treatment. 6. There is the onset of clinical symptoms meeting medical necessity criteria for admission: <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee does not require 24-hour professional monitoring, supervision and assistance.

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	discharge planning.	<ol style="list-style-type: none"> 2. Enrollee can be safely and feasibly treated at a less intensive and restrictive level of care. 3. Enrollee is seeking admission to inpatient treatment primarily for reasons other than medical necessity (e.g., to comply with a court-order, to obtain shelter, to deter runaway/truant behavior, to achieve family respite, etc.) 4. Enrollee is primarily suffering from a medical problem that requires inpatient treatment on a medical/surgical unit. <p>Discharge Criteria (Must meet 1-3; or 4)</p> <ol style="list-style-type: none"> 1. The symptoms/behaviors that precipitated admission have sufficiently improved so that the enrollee can be maintained at a less intensive and restrictive level of care and the enrollee will not be compromised with treatment being given at a less intensive and restrictive level of care. 2. A comprehensive discharge plan has been developed in consideration of the enrollee's; <ol style="list-style-type: none"> a. strengths b. compliance with past treatment c. social and/or familial support system d. resources and skills e. identification of triggers for relapse; and other factors/obstacles to improvement, and f. living arrangements (when needed). 3. Arrangements for follow-up care have been made including a scheduled appointment within one week of discharge. <p style="text-align: center;">Or</p> <ol style="list-style-type: none"> 4. Inpatient psychiatric treatment is discontinued because: <ol style="list-style-type: none"> a. A diagnostic evaluation and/or a medical treatment has been completed when one of these constitutes the reason for admission; or b. The enrollee withdraws from treatment against medical advice and does not meet criteria for involuntary commitment; or c. The enrollee is transferred to another facility/unit for continued inpatient care.

I. INPATIENT HOSPITALIZATION SERVICES

d. Crisis Stabilization Unit- Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Crisis Stabilization Unit- this can substitute for inpatient as a downward substitution on a 2 CSU day for 1 inpatient day ratio when determined medically appropriate.</p>	<p>Crisis services must be available to address broad categories of difficulties. A mental health crisis is defined as any mental health issue that is perceived to be a crisis by an enrollee, family member, teacher, group home, hospital staff, law enforcement personnel, medical or behavioral health provider, other agency, facility, or person. An urgent condition is defined as the onset of a psychiatric condition, not constituting an immediate and substantial likelihood of harm to self or others, but if left untreated, one which may deteriorate into a psychiatric emergency.</p> <p>Admission Service Components (Must meet <i>all</i> of the following) Professional staff consisting of a multidisciplinary treatment team to include:</p> <ul style="list-style-type: none"> • A psychiatrist, preferably Board certified; for children and adolescents, a Board certified child and adolescent psychiatrist is strongly recommended. The psychiatrist is available on-call 24 hours per day, and conducts daily rounds. • At least one Registered Nurse who is available 24 hours per day/7 days per week; and • Psychologists, social workers, educational specialists, other mental health professionals and ancillary staff available when clinically indicated. 	<p>Admission Criteria (Must meet all four criteria for Inpatient Hospital Services, Psychiatric, plus the following 5th criterion):</p> <p>5. A clinical face-to-face evaluation, at the time of admission or soon before, reveals a psychiatric emergency/crisis that is likely to respond to short-term crisis intervention type of services sufficiently to allow enrollee to be transitioned to a less intensive level of care in a brief time. Additionally:</p> <ol style="list-style-type: none"> a. An individualized treatment plan must be developed for each enrollee utilizing the services. b. The treatment plan must include a projected short-term discharge date and address the enrollee's anticipated post-discharge needs. c. The treatment plan must include, if indicated, medication management by a psychiatrist with medication dispensing by a registered nurse. <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee does not have one of the following ICD-9-CM codes as a suspected diagnosis: 290.0-290.43, 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 2. Enrollee can be safely and feasibly treated at a less intensive and restrictive level of care. 3. Enrollee is seeking admission to inpatient primarily for reasons other than medical necessity, (e.g., to comply with a court-order, to obtain shelter, to deter runaway/truant behavior, to achieve family respite, etc.). 4. Enrollee is primarily suffering from a medical problem that requires inpatient intervention on a medical/surgical unit. 5. Enrollee has a Mental Disorder Due to a Medical Condition or has a primary substance abuse diagnosis.

II. OUTPATIENT HOSPITAL CARE--

Emergency Room, Psychiatric Clinic, Psychiatric Visit/Individual Therapy, ECT, Psychological Testing—Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Emergency Room Services are mental health treatment services provided by qualified mental health professionals that are available 24 hours/ 7 days per week and directed toward assessing and treating crisis situations of a clinical nature. These services are commonly provided in a hospital setting supervised by a licensed physician.</p>	<p>A psychiatric emergency is defined as an onset of a psychiatric condition that involves an immediate, substantial risk of serious harm to self, others or property, or an inability to maintain functioning in the community due to the DSM-IV-TR Axis I diagnosis. For each mental health crisis, the goal is to intervene as early as possible to prevent the development of more serious problems. Emergency services must be under the supervision of a licensed physician and provide access to mental health specialists. The Emergency Department must have full medical services capable of assessing complicating medical conditions contributing to the behavioral crisis or serving as an etiological factor. Clinicians must be able to complete a biopsychosocial assessment including, but not limited to, the enrollee's relevant history, previous treatment, current medical conditions (including medications), substance abuse history, lethality assessment and complete Mental Status Exam -- all in the service of identifying the cause(s) of the mental health crisis. Clinicians must be able to involve the enrollee's family in crisis resolution and be able to refer for inpatient admission if indicated.</p>	<p>There is no need for pre-authorization for emergency department services when the enrollee, family, support person, provider, etc. believe the situation to be a true behavioral emergency. Excluded are situations which are determined by the enrollee and/or enrollee's family to be routine visits for convenience rather than true behavioral health emergencies.</p>
<p>Psychiatric Clinic and Psychiatric Visit/Individual Therapy include routine outpatient mental health services such as evaluation and assessment, individualized treatment planning, medication management, and individual counseling/therapy.</p>	<p>Specifications for these services may be found under <i>IV. Community Mental Health Services</i></p>	<p>Utilization Management Guidelines for these services may be found under <i>IV. Community Mental Health Services</i>.</p>
<p>Psychiatric Electroconvulsive Therapy (ECT). ECT (or Electroshock Therapy) is an established form of treatment for a variety of mental conditions particularly Major Depression, Bipolar Depression, and Catatonic Schizophrenia.</p>	<p>ECT needs to be conducted in a fully-equipped medical facility with full emergency medical capability to manage any complications of the ECT. The procedure needs to be directed by a Board-certified psychiatrist who is qualified to conduct ECT through appropriate training and experience. Assisting the procedure should be an anesthesiologist or anesthetist.</p>	<p>In order to qualify for authorization for ECT, the provider needs to develop a treatment plan consistent with the guidance provided by Magellan's adopted clinical practice guidelines:</p> <p><i>APA Practice Guideline for the Treatment of Patients With Major Depressive Disorder, Second Edition</i></p> <p><i>APA Practice Guideline for the Treatment of Patients With Schizophrenia, Second Edition</i></p>
<p>Psychological Testing</p>	<p>Specifications for this service may be found in <i>XII. Psychological Testing</i>.</p>	<p>Utilization Management Guidelines for these services may be found Under <i>XII. Psychological Testing</i>.</p>

III. PHYSICIAN SERVICES- ADULT AND CHILD/ADOLESCENT

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Physician services are rendered by a licensed physician with the appropriate Medicaid specialty requirements, when applicable. There are two types of physician services:</p>	<p>The psychiatrist providing physician services must be certified by the American Board of Psychiatry and Neurology or the American Osteopathic Board of Neurology and Psychiatry or have completed a psychiatry residency accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada.</p>	
<p>Psychiatric consultations (medical/surgical service, nursing home, etc.)</p>	<p>A physician consultation must include a psychiatric examination (including the Mental Status Exam) and evaluation of the enrollee with information from family members or significant others as appropriate. Written documentation of an exchange of information with the attending physician and/or primary care physician must be included.</p>	<p>No preauthorization of service is required.</p> <p>Admission Criteria:</p> <p>Magellan uses its Mixed Services protocols to determine the process for claims payment of such consults. If the service is provided by a psychiatrist to treat a behavioral health disorder, then the protocols indicate that it is a Magellan managed service.</p>
<p>Inpatient psychiatric visit</p>	<p>An inpatient psychiatric visit must be documented with a mental health procedure code and mental health diagnosis code. All procedures with a minimum time requirement must be documented in the medical record to show the time spent providing the service to the enrollee. Daily physician visits with documentation of such are required.</p>	<p>This service is allowed for one visit per day when inpatient services have been authorized. Admission, Continued Stay, Exclusion, and Discharge criteria are the same as for Inpatient Services.</p>

IV. COMMUNITY MENTAL HEALTH SERVICES

a. Individual Treatment Plan Development and Modification, Evaluation and Assessment Services, Medical & Psychiatric – Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Individual Treatment Plan Development and Modification - Includes:</p> <ul style="list-style-type: none"> • Treatment Plan Development – An individualized treatment plan is developed by using an assessment tool to create a structured, goal-oriented, schedule of services. This plan is developed by the enrollee and treatment team and contains attainable goals and measurable objectives. • Treatment Plan Review – This process is used to make sure that treatment goals, objectives and services continue to be appropriate based on the enrollee’s progress. A formal review is conducted at least every six months or as needed, based on significant changes. 	<p>Treatment Plan Development</p> <ol style="list-style-type: none"> 1. The individualized treatment plan is a structured, goal-oriented schedule of services developed by the enrollee and the treatment team. The plan must contain written treatment-related goals and measurable objectives. 2. A Brief Behavioral Health Status Examination, Psychiatric Evaluation (including the Mental Status Exam) or other assessment conducted by a licensed practitioner of the healing arts must be completed prior to the development of the treatment plan. An assessment by a licensed practitioner of the healing arts completed within the past six months may be used to satisfy this requirement. <p>The treatment plan must contain all of the following components:</p> <ul style="list-style-type: none"> • The enrollee’s ICD-9-CM diagnosis code(s) consistent with assessment(s); • Goals that are appropriate to the enrollee’s diagnosis, age, culture, strengths, abilities, preferences and needs expressed by enrollee(s); • Measurable objectives and target dates; • A list of the services to be provided (Treatment Plan Development, Treatment Plan Review, and Comprehensive Behavioral Health Assessment need not be listed); • The amount, frequency and duration of each service for the six month duration of the treatment plan (e.g., 4 units of therapeutic behavioral on-site services 2 days per week for 6 months); • It is not permissible to use the terms “as needed,” “p.r.n.,” or to state that the enrollee will receive a service “x to y times per week.” • Signature of the enrollee; • Signature of the enrollee’s parent, guardian, or legal custodian (if the enrollee is under the age of 18); • Signatures of the treatment team members who participated in development of the plan; • A signed statement by the treating practitioner that services are medically necessary and appropriate to the enrollee’s diagnosis and needs; and • Transition or discontinuation of services. <p>Treatment Plan Review</p> <ol style="list-style-type: none"> 1. The treatment plan review is a process conducted to make sure that treatment goals, objectives and services continue to be appropriate to the enrollee’s needs and to assess the enrollee’s progress and continued need for services. 	<p>No preauthorization is required for these services.</p> <p>Admission Criteria, Continued Stay Criteria, Discharge Criteria, and Exclusion Criteria shall be consistent with the Florida Medicaid Community Behavioral Health Services Coverage and Limitations Handbook.</p>

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	<p>The treatment plan review requires the participation of the enrollee and the treatment team identified in the enrollee's individualized treatment plan as responsible for addressing the treatment needs of the enrollee</p> <p>2. A formal review of the treatment plan must be conducted at least every six months. The treatment plan may be reviewed more often than once every six months when significant changes occur in the enrollee's clinical status.</p>	
<p>Evaluation and Assessment Services—Include:</p> <ul style="list-style-type: none"> • Psychiatric Evaluation – a comprehensive evaluation that investigates the enrollee's clinical status including past and present psychiatric history, physical and medication history; relevant personal and family medical history; personal strengths and a brief Mental Status Exam. This evaluation includes a summary, diagnostic formulation and treatment recommendations. • Brief Behavioral Health Status Examination – brief clinical, psychiatric, diagnostic interview to assess behavioral stability or treatment status. • Psychiatric Review of Records – review of records includes psychiatric reports, psychometric or projective tests, clinical and psychological evaluation data for diagnostic use in evaluating and planning for enrollee care. • In-Depth Assessment – diagnostic tool for collecting information to establish or support a diagnosis and development or modification to the treatment plan and discharge criteria. • Biopsychosocial Evaluation – provides information on biological, psychological and social factors that may have contributed to the enrollee's need for services. The evaluation includes a brief Mental Status Exam and preliminary 	<p>Evaluation and Assessment Services</p> <ol style="list-style-type: none"> 1. These services include psychological testing and evaluations that assess the enrollee's functioning in all areas. All evaluations must be appropriate to the age, developmental level and functioning of the enrollee. All evaluations must include a clinical summary that integrates all the information gathered and identifies the enrollee's needs. The evaluation should prioritize the clinical needs, evaluate the effectiveness of any prior treatment, and include recommendations for interventions and services to be provided to the enrollee. 2. Prior to receiving any community mental health services, children ages 0-5 must have: a current assessment (within one year) of presenting symptoms and behaviors; developmental and medical history; family, psychosocial and medical history; assessment of family functioning; a clinical interview with the primary caretaker and an observation of the enrollee's interaction with the caretaker; and, an observation of the enrollee's language, cognitive, sensory, motor, self-care, and social functioning. <p>The evaluation and assessment contains the following elements and must be provided (at a minimum) by the following clinicians:</p> <ol style="list-style-type: none"> 1. Psychiatric evaluation—psychiatrist, other qualified physician, or psychiatric ARNP 2. Brief Behavioral Health Status Examination—licensed practitioner of the healing arts or master's level certified addictions professional. 3. Psychiatric Review of Records—psychiatrist or other qualified physician, or psychiatric ARNP. 4. In-Depth Assessment—master's level practitioner. 5. Biopsychosocial Evaluation—bachelor's level practitioner or certified addictions professional. 6. Psychological Testing-psychologist or other individual practitioner with the scope of professional licensure, training, and competence and in accordance with applicable statutes. 7. Limited Functioning Assessment—individual who has been authorized by DCF to administer the assessment. 	<p>No preauthorization is required for these services (excluding psychological testing).</p> <p>Admission Criteria, Continued Stay Criteria, Discharge Criteria, and Exclusion Criteria shall be consistent with the Florida Medicaid Community Behavioral Health Services Coverage and Limitations Handbook.</p>

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>service recommendations.</p> <ul style="list-style-type: none"> • Psychosocial Testing – assessment, evaluation and diagnosis of the enrollee's mental status or psychological condition through use of standardized testing methodologies. • Limited Functional Assessment – This is limited to the administration of functional assessments required by the Department of Children and Family (DCF) including Multnomah Community Ability Scale (MCAS), Functional Assessment Rating Scale (FARS), and the Children's Functional Assessment Rating Scale (C-FARS). 		<p><i>See XII. Psychological Testing.</i></p>
<p>Medical and Psychiatric Services include the evaluation of the need for medication; evaluation of clinical effectiveness and side effects of medication; prescribing, dispensing, and administering of medications; medication education; planning related to service delivery and evaluating the status of the enrollee's community functioning.</p> <ul style="list-style-type: none"> • Medication management includes the discussion of indications and contraindications for treatment, risks and management strategies based on the review of laboratory test results, prior pharmacy intervention and current medication usage with the enrollee or other responsible persons. • Brief Individual Medical Psychotherapy includes insight-oriented, cognitive-behavioral or supportive therapy treatment designed to reduce maladaptive behaviors related to the enrollee's behavioral health disorder. This treatment is designed to maximize behavioral self control or to restore normal functioning and more 	<ol style="list-style-type: none"> 1. Medication Management Medication management must be provided, at a minimum, by a psychiatrist, other qualified physician, physician assistant, or psychiatric ARNP. 2. Brief Individual Medical Psychotherapy Brief individual medical psychotherapy must be provided, at a minimum, by a psychiatrist or other qualified physician, physician assistant, or psychiatric ARNP. 3. Group Medical Therapy Group medical therapy must be personally rendered by a psychiatrist or psychiatric ARNP. Total group size should not exceed 10 participants. 4. Behavioral Health Screening Service Behavioral health screening services must be provided, at a minimum, by a psychiatrist, other qualified physician, physician assistant, ARNP or registered nurse. 5. Behavioral Health Services Specimen collection, taking vital signs, administering injections must be provided by an individual qualified by his/her professional licensure, training, protocols and competence and within the purview of statutes applicable to his/her profession. Verbal interaction must be provided, at a minimum, by a physician's assistant, ARNP, or R.N. 6. Methadone or Buprenorphine Administration 	<p>No preauthorization is required for these services. Admission Criteria, Continued Stay Criteria, Discharge Criteria, and Exclusion Criteria shall be consistent with the Florida Medicaid Community Behavioral Health Services Coverage and Limitations Handbook.</p> <p>There are two parameters that guide Magellan's authorization process for integrated services:</p> <ul style="list-style-type: none"> • The suggested service must be linked to the mental health needs of the enrollee, <i>and</i> • The service should complement and not conflict with the larger, mutually agreed-upon, person-centered recovery treatment plan that helps the enrollee live successfully in his or her home or community.

Service Description and
Common Service Settings

Magellan Specifications

Magellan Utilization Management Guidelines

appropriate interpersonal and social relationships.

- **Group Medical Therapy** is designed to reduce maladaptive behaviors; maximize self control and restore normal functioning, enabling more appropriate interpersonal and social relationships. This service includes continuing medical diagnostic evaluation and medication management and may include insight-oriented, cognitive-behavioral and supportive therapy.
- **Behavioral Health Screening Service** includes a face-to-face assessment of the enrollee's physical status and a brief history and decision-making of low complexity. The screening includes vital signs, medication management, a brief mental status assessment and a plan for follow-up, if necessary.
- **Behavioral Health Services** are outpatient services provided to enrollees with a mental illness. The procedure code covers specimen collection, vital signs, administering injections; or verbal interaction between the practitioner and enrollee of at least 15 minutes.
- **Methadone or Buprenorphine Administration** – this service is reimbursed for the administration of methadone or buprenorphine for opioid addiction treatment by a program licensed by the state and certified by the Federal Substance Abuse and Mental Health Services Administration (SAMHSA) in accordance with state and federal guidelines.

Methadone or buprenorphine administration must be provided by an individual who is qualified by his/her professional licensure, training, protocols and competence and within the purview of statutes applicable to his/her profession.

Methadone or buprenorphine administration must be documented according to state and federal regulations and placed in the clinical record.

This service is authorized when it is a Medicaid-reimbursable service for the covered population.

IV. COMMUNITY MENTAL HEALTH SERVICES

b. Mental Health Counseling/Therapy – Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Mental Health Counseling/Therapy are treatment services provided by qualified mental health professionals that are directed toward ameliorating symptoms of a mental health disorder and/or maintaining stability and functional autonomy for enrollees with severe and persistent mental illness. Outpatient services are specific in targeting the symptoms or problem being treated.</p> <p>Common Service Types:</p> <ul style="list-style-type: none"> • Individual and family therapy may involve the enrollee and his/her family with or without the enrollee present. Services include the provision of insight-oriented, cognitive-behavioral or supportive therapy. • Group therapy includes sharing clinical information, education, counseling or advising family or other responsible persons on how to assist the enrollee. The group size is limited to 10 recipients who have a mental health diagnosis or up to 15 participants who have a substance abuse diagnosis. 	<p>Admission Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Professional staff. <ol style="list-style-type: none"> a. Must be licensed or certified at the independent practice level. b. If unlicensed must be supervised at least weekly by an appropriately licensed professional; all documentation should be counter-signed by the licensed supervisor. c. Services provided must be within the therapist's scope of training and license. 2. Complete biopsychosocial assessment including, but not limited to the enrollee's relevant history, previous treatment, current medical conditions (including medications), substance abuse history, lethality assessment and a complete Mental Status Exam. 3. Development of an individualized, strengths-based, targeted, focused treatment plan directed toward the reduction or alleviation of the impairment that resulted in the enrollee seeking treatment. The plan must reflect the least restrictive, most efficacious treatment available. 4. Development of specific, achievable, behaviorally based and objective treatment goals which directly address the problems that resulted in the enrollee seeking treatment. <p>Continued Stay Service Components - (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Initial treatment plan has been formulated and is in the process of implementation. 2. Active and timely treatment is focused upon 	<p>Admission Criteria (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Validated principal DSM-IV Axis I or II diagnosis as part of a complete multi-axial diagnostic evaluation. 2. Level of Stability - (Must meet all of the following) <ol style="list-style-type: none"> a. Risk to self, others or property is not imminent (although without treatment the enrollee's potential risk in these areas may be increased). b. The enrollee is medically stable and does not require a level of care that includes more intensive medical monitoring. c. When an Axis II diagnosis is involved, treatment is directed to the acute symptoms which place enrollee at risk and/or impair functioning. 3. Degree of Impairment – (Must meet at least one of the following): <ol style="list-style-type: none"> a. Enrollee exhibits impairments in cognitive, affective, or behavioral abilities. b. Social/Interpersonal/Familial-- Enrollee exhibits impairment in social, interpersonal or familial functioning arising from a psychiatric disorder or a serious emotional disturbance which may indicate a need for outpatient psychotherapy to stabilize or reverse the condition. c. Vocational/Educational--Enrollee exhibits impairment in occupation or educational functioning arising from a psychiatric disorder or a serious emotional disturbance which may indicate a need for outpatient psychotherapy to stabilize or reverse the condition. <p>Continued Stay Criteria (Must meet 1 through 4, and either 5, 6, 7, or 8)</p> <ol style="list-style-type: none"> 1. Validated DSM-IV Axis I or II diagnosis with exacerbation, or definable and discrete active symptoms. Axis II principal diagnosis must be accompanied by acute symptoms which are the focus of treatment. 2. There is a reasonable expectation that the enrollee will benefit from ongoing outpatient treatment. <p>Benefit is defined as: demonstrated improvement in previous treatment as validated by objective tracking of progress toward treatment goals; and the enrollee's pre-morbid functioning suggests that he/she has not maximized his/her likely level of functioning.</p>

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	<p>stabilizing or reversing symptoms which necessitated outpatient treatment.</p> <ol style="list-style-type: none"> 3. Level of intervention is consistent with current enrollee risk factors for harm to self, others or property. 4. Treatment plan has been modified to reflect enrollee's progress and/or new information that has become available during the outpatient treatment. 5. Routine assessments and treatment progress updates are completed. 6. Enrollee and family, to the extent possible and as clinically appropriate, are involved in treatment and discharge planning. 7. Natural community supports are identified. 	<ol style="list-style-type: none"> 3. Enrollee is making progress to the extent possible, toward goals and is benefiting from the treatment plan, as evidenced by the attainment of therapeutic rapport, lessening of symptoms and stabilization of psycho-social functioning through treatment planning, homework and session attendance. 4. For children/adolescents, there is significant opportunity for family (including the enrollee) cooperation and involvement in the treatment process, except where the involvement of family members other than the enrollee would be clinically counter-productive or legally prohibited. 5. As age appropriate, treatment promotes the enrollee's self-efficacy and independent functioning. 6. Current symptoms significantly impair the enrollee's ability to perform activities of daily living or significantly impair the enrollee's social, occupational or interpersonal functioning. 7. There is reasonable expectation, based on the enrollee's clinical history that withdrawal of treatment will result in the enrollee's decompensation or the recurrence of signs or symptoms. 8. Appearance of new problems which meet medical necessity for this level of care. <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee's identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis for one of the following ICD-9-CM codes: 290.0-290.43, 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 2. Substance abuse is the primary source of the enrollee's impairment in the absence of active symptoms. 3. Enrollee's condition has active components of significant risk to self or others or property such that a higher level of care is medically necessary. <p>Discharge Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee no longer meets continued stay medical necessity criteria. 2. Enrollee withdraws from treatment against medical advice.

IV. COMMUNITY MENTAL HEALTH SERVICES

c. Psychosocial Rehabilitative Services – Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Psychosocial rehabilitative services assist enrollees with functional disabilities resulting from mental illness in order to develop, enhance, and/or retain: psychiatric stability, social competencies, personal adjustment and/or independent living competencies, so that enrollees experience more success and satisfaction in the environments of their choice and can function as independently as possible (and as age-appropriate).</p> <p>These interventions should occur with necessary clinical treatments and should begin as soon as possible, following diagnosis. A planned program of goal setting, functional assessment, identification of needed and preferred skills and supports, skill teaching and managing supports and resources, is needed to produce the desired outcomes consistent with an enrollee's cultural environment.</p> <p>Psychosocial rehabilitation services are designed to assist the enrollee to compensate for or eliminate functional deficits and interpersonal and environmental barriers created by their disabilities, and to restore social skills for independent living and effective life management. Psychosocial rehabilitation services differs from counseling and therapy in that they concentrates less upon the amelioration of symptoms and more upon restoring functional capability. Although children and adolescents may qualify for this level of care, typically psychosocial rehabilitation services are geared for adults with severe mental illness in order to assist them in their recovery.</p> <p>Common Settings:</p> <p>Psychosocial rehabilitative services may be</p>	<p>Admission Service Components – (Must provide all of the following):</p> <ol style="list-style-type: none"> Professional staff—Psychosocial rehabilitation services must be provided, at a minimum, by: <ul style="list-style-type: none"> Behavioral health technician under the supervision of a bachelor's level practitioner; Bachelor's level practitioner under the supervision of a master's level practitioner; Substance abuse technician or certified addictions professional (for enrollee's with co-occurring substance abuse disorders). The psychiatric rehabilitation process consists of three phases – assessment, planning and implementation. Each phase involves the enrollee, the enrollee's identified support system and the enrollee's service provider in designing the development of wanted and needed skills and supports relevant to the enrollee's background. A functional or goal-based individualized assessment includes the completion of an evaluation of social and environmental supports and an evaluation of strengths and unmet needs in areas of psychosocial functioning as they relate to the enrollee's goals and priorities consistent with the enrollee's culture. <ol style="list-style-type: none"> Planning includes developing an enrollee - specific rehabilitation plan which establishes goals and objectives and plans for skill and support development. The plan development involves both staff and enrollee (if he/she chooses) involvement using methods appropriate to the psychiatric rehabilitation program model. In site-based programs, the implementation of services may take place individually or in 	<p>Admission Criteria – (Must meet all of the following):</p> <ol style="list-style-type: none"> The presence or history of a serious mental illness, based upon medical records, which includes one of the following ICD-9-CM diagnoses by a psychiatrist: This diagnosis must be one of the following ICD-9-CM codes: 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9 As a result of the mental illness, the enrollee has a moderate to severe functional impairment that interferes with or limits role performance in at least one (1) of the following domains: <ol style="list-style-type: none"> educational (i.e., obtaining a high school or college degree); social (i.e., developing a social support system); vocational (i.e., obtaining part-time or full-time employment); self-maintenance (i.e., managing symptoms, understanding his/her mental illness, managing money, living more independently) relative to the enrollee's ethnic/cultural environment; and The enrollee chooses to participate in the program. <p>Following criteria guide service location:</p> <p>Indicators for Site-Based Services:</p> <ol style="list-style-type: none"> Enrollee is willing and able to participate in groups. Enrollee is interested in participating in a variety of site-based experiences as part of choosing a goal. Specific skills, supports and experiences needed for the enrollee to be able to accomplish his/her psychosocial rehabilitation goals are available in the context of the site-based program Enrollee chooses to participate in the program. <p>Indicators of Mobile Services:</p> <ol style="list-style-type: none"> The enrollee is currently unable to attend a site-based service The enrollee is setting a goal which needs substantial community exploration or practice. Example: enrollee is planning to live independently in his/her own house or apartment in the community, The nature of the enrollee's goal indicates the preferred site for service delivery and supports is the community. Example: enrollee is returning to

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>provided in a facility, home, or community setting.</p>	<p>groups. Group size is limited to 12 enrollees. In mobile programs, services are delivered individually (or for up to two persons, as outlined under mobile description).</p> <p>The following are examples of appropriate services which should be provided as consistent with the enrollee's culture: Description/Characteristics of Site-Based Services:</p> <ol style="list-style-type: none"> a. Services combine medication use; independent living and social skills training; support to enrollees and their families; housing; pre-vocational and transitional employment rehabilitation training; social support; structured activities to diminish tendencies towards isolation and withdrawal; teaching the enrollee and family about symptom management, medication and treatment options. b. Activities for adults and adolescents transitioning to adult services include development and maintenance of necessary daily living skills, food planning and preparation money management maintenance of the living environment and training in appropriate use of community services. c. Services for children and adolescents focus on helping them achieve a level of functioning that would be expected of typically developing individuals their age. Services must be individualized and directly related to goals for improving functioning. d. An initial planning process must begin upon the first day of attendance. An individualized, enrollee-specific rehabilitation assessment and plan must be developed and must be reviewed and revised every three months thereafter. e. The case record must include monthly progress notes for site-based rehabilitation. <p>4. Description/Characteristics of Mobile Psychiatric Rehabilitation Programs:</p>	<p>college to complete a college degree.</p> <ol style="list-style-type: none"> 4. The enrollee is already in a role in a community site and needs services to be successful and satisfied in this role. 5. The enrollee chooses to participate in a mobile program. <p>Concurrent use of Site-Based and Mobile Services: Mobile and site-based psychiatric rehabilitation can be provided concurrently under certain limited circumstances as follows:</p> <ol style="list-style-type: none"> 1. The enrollee is transitioning to a site-based service and needs assistance in the transition. 2. The enrollee is transitioning from site-based to mobile and needs assistance in this transition. 3. Specific issues have been identified which require both services. <p>Continued Stay Service Components (Must meet 1 and 2)</p> <ol style="list-style-type: none"> 1. An assessment appropriate to the model of recovery indicates at least one of the following: <ol style="list-style-type: none"> a. As a result of the mental illness, there are or continue to be functional impairments and skill deficits which are effectively addressed in the psychiatric rehabilitation plan. In the event that earlier efforts have not achieved the intended objectives, the revised plan indicates service modifications to address these issues. <p style="text-align: center;">Or</p> b. There is a reasonable expectation that the withdrawal of services may result in loss of rehabilitation gains or goals attained by the enrollee. <p style="text-align: center;">Or</p> <ol style="list-style-type: none"> c. A change in program or level of service is indicated and a transition plan is in place reflecting the proposed change. 2. The enrollee chooses to continue participation in the program. <p>Exclusion Criteria: (Any of the following)</p> <ol style="list-style-type: none"> 1. Enrollee's identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis of one of the following ICD-9-CM codes: 290.0-290.43, 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 2. Substance abuse is the primary source of impairment in the absence of active symptoms.

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	<ul style="list-style-type: none"> a. The service is generally designed to be a short-term intervention based upon individual goals. b. Mobile services are generally provided on a weekly basis for a limited number of hours. c. Services are provided in the community such as at the enrollee's home, an educational setting or other community setting. d. Community resources are used rather than program-based resources. e. Services are on an individual (1:1 basis) and are face-to-face. <u>Note:</u> On a case-by-case basis, a 2:1 staffing approach may be used in certain situations when two enrollees are working on similar goals. All services to be delivered on this basis must have approval from both enrollees involved in the service as well as from the county or managed care organization. f. An individualized, person-specific rehabilitation assessment and plan must be developed and be reviewed and revised every three months. g. The case record must include progress notes for each encounter in mobile rehabilitation. h. The records should also include documentation of duration of and scope of services provided during each visit. 	<ul style="list-style-type: none"> 3. Enrollee abandons the intent of or is incapable of moving toward independent living. 4. Enrollee is a passive participant and therefore unable to participate actively in the development and execution of a rehabilitative plan. <p>Discharge Criteria (Must meet criteria 1 through 3, and either 4 or 5)</p> <ul style="list-style-type: none"> 1. The enrollee is not expected to receive additional rehabilitative benefit from the program; 2. There is a reasonable expectation that the withdrawal of services will not result in loss of rehabilitation gains or goals attained by the enrollee. 3. The enrollee has successfully achieved rehabilitation goals and sustained them for a period of time as designated in the rehabilitation plan; 4. The enrollee voluntarily terminates from the program.

IV. COMMUNITY MENTAL HEALTH SERVICES

d. Behavioral Health Day Services –Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Common Service Types:</p> <p>Behavioral health day services are designed to enable enrollees to function successfully in the community in the least restrictive environment and to restore or enhance their ability for personal and social life management skills. This service is larger than group counseling, serving more recipients at one time with greater variety and clinical objectives. The primary function is to stabilize symptoms related to a behavioral health disorder in order to reduce or eliminate the need for more intensive and restrictive levels of care. This service is designed to provide transitional treatment after an acute episode or to provide a level of therapeutic intensity not possible in a traditional outpatient setting.</p> <p>Medicaid will not reimburse for behavioral health day services where total group size for group therapy exceeds 10 participants who are receiving treatment for a mental health disorder. For group therapy where recipients are receiving treatment for a substance abuse disorder, the total group membership may not exceed 15 participants.</p> <p>For reimbursement, the service must be provided for a minimum of two hours per day, per recipient. At least one hour per day must consist of individual, group therapy, or family services (may be a combination of these services).</p> <p>Medicaid will not reimburse for behavioral health day services the same day as psychosocial rehabilitation services.</p>	<p>Admission Service Components (Must meet all of the following)</p> <ol style="list-style-type: none"> 1. Professional staff must be: <ol style="list-style-type: none"> a. Either licensed or certified at the independent practice level with experience in the treatment of children and adolescents; or b. Unlicensed and supervised at least weekly by an appropriately licensed professional, and c. Services provided must be within the therapist's scope of training. 2. Complete biopsychosocial assessment including, but not limited to the enrollee's relevant history, previous treatment, current medical conditions (including medications), substance abuse history, personal strengths, lethality assessment and mental status. 3. Development of an individualized, strengths-based, targeted, focused treatment plan directed toward the reduction or alleviation of the impairment that resulted in the enrollee seeking treatment. The plan must reflect the least restrictive, most efficacious treatment available. 4. Development of specific, achievable, behaviorally based and objective treatment goals which directly address the problems that resulted in the enrollee seeking treatment. <p>Continued Stay Service Components - (Must meet all of the following)</p> <ol style="list-style-type: none"> 1. Initial treatment plan has been formulated and is in the process of implementation. 2. Active and timely treatment is focused upon stabilizing or reversing symptoms which necessitated outpatient treatment. 3. Level of intervention is consistent with current enrollee risk factors for harm to self, others or 	<p>Admission Criteria (Must meet all of the following):</p> <ol style="list-style-type: none"> 1. Validated principal DSM-IV Axis I or II diagnosis as part of a complete multi-axial diagnostic evaluation. Claims for services rendered by community behavioral health services providers will be paid only for the following diagnosis codes:: 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9. 2. Level of Stability - (Must meet all of the following): <ol style="list-style-type: none"> a. Risk to self, others or property is not imminent (although without treatment the enrollee's potential risk in these areas may be increased). b. The enrollee is medically stable and does not require a level of care that includes more intensive medical monitoring. c. When an Axis II diagnosis is involved, treatment is directed to the acute symptoms which place enrollee at risk and/or impair functioning. 3. Degree of Impairment – (Must meet at least one of the following): <ol style="list-style-type: none"> a. Enrollee exhibits impairments in cognitive, affective, or behavioral abilities. b. Social/Interpersonal/Familial-- Enrollee exhibits impairment in social, interpersonal or familial functioning arising from a psychiatric disorder or a serious emotional disturbance which may indicate a need for outpatient psychotherapy to stabilize or reverse the condition. c. Vocational/Educational-Enrollee exhibits impairment in occupation or educational functioning arising from a psychiatric disorder or a serious emotional disturbance which may indicate a need for outpatient psychotherapy to stabilize or reverse the condition. <p>Continued Stay Criteria (Must meet 1 through 4, and either 5, 6, 7, or 8)</p> <ol style="list-style-type: none"> 1. Validated DSM-IV Axis I or II diagnosis with exacerbation, or definable and discrete active symptoms. Axis II principal diagnosis must be accompanied by acute symptoms which are the focus of treatment. 2. There is a reasonable expectation that the enrollee will benefit from ongoing outpatient treatment. Benefit is defined as: demonstrated improvement in previous treatment as validated by objective tracking of progress toward

IV. COMMUNITY MENTAL HEALTH SERVICES

e. Clubhouse - Adult

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>A Clubhouse is a place where people who have a mental illness come to rebuild their lives. Clubhouse services are structured community-based group services that are provided in a group-rehabilitative setting. These services include a range of social, educational, pre-vocational, and transitional employment rehabilitation training utilizing behavioral, cognitive or supportive interventions to improve an enrollee's potential for establishing and maintaining social relationships and obtaining occupational or educational achievements. Every opportunity provided is the result of the efforts of the enrollees and staff, who collaborate in this process.</p> <p>A clubhouse group service is designed to strengthen and improve the enrollee's interpersonal skills and to provide psychosocial therapy toward rehabilitation that emphasizes a holistic approach focusing on the enrollee's abilities to promote recovery from his/her mental illness. This service is primarily rehabilitative in nature, using a wellness model that offers a setting to restore independent living skills. These services are designed to assist the enrollee to eliminate the functional, interpersonal and environmental barriers created by their disabilities and to restore social skills for independent living and effective life management. The</p>	<p>Admission Service Components (Must meet <i>all</i> of the following):</p> <ol style="list-style-type: none"> 1. A Clubhouse is certified by the International Center for Clubhouse Development (ICCD); or 2. A Clubhouse is accredited by the State as an appropriate mental health provider and submits a plan for and agrees to attain ICCD certification within three years. 3. The provider must have a contract with the Department of Children and Families to specifically provide mental clubhouse services and be an enrolled Medicaid provider. 4. Clubhouse staff has 24-hour access to a State licensed independent mental health professional or a licensed psychiatrist. A Program Director shall be responsible for the delivery of daily services and be appropriately licensed by the State. 5. There is ongoing documentation of the enrollee's activities/progress. Treatment should be enrollee-driven and goals must be documented in a treatment plan. 6. Clubhouse activity should be coordinated with all other mental health treatment providers and 	<p>Admission Criteria (Must meet <i>all</i> of the following):</p> <ol style="list-style-type: none"> 1. The enrollee is an adult with a chronic mental illness diagnosed by a psychiatrist which includes one of the following ICD-9-CM codes: 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9. 2. As a result of the mental illness, the enrollee has a moderate to severe functional impairment that interferes with or limits his/her performance in at least one (1) of the following domains: <ol style="list-style-type: none"> a. educational (i.e., obtaining a high school or college degree); b. social (i.e., developing a social support system); c. vocational (i.e., obtaining part time or full time employment); d. self-maintenance (i.e., managing symptoms, understanding their illness, managing money, living more independently) relative to the enrollee's ethnic/cultural environment; <i>and</i> 3. The enrollee chooses to participate in the program. 4. Enrollees will be assessed using the following criteria. The <i>Graduate</i> and <i>Maintenance</i> levels are intended for long term use. <ul style="list-style-type: none"> • Low level: Enrollees are given opportunities to participate in a work-ordered day within the Clubhouse. They choose to participate in one of the units (kitchen, clerical). Meaningful work opportunities are offered by staff in order for the enrollee to regain a sense of usefulness and belonging. Enrollees at this level may begin to attend at this stage or may be ambivalent about increasing their involvement with the Clubhouse. Clubhouse staff focus on developing a relationship with the enrollee and encouraging increased involvement with the Clubhouse. Enrollees at this stage may be experiencing persistent psychiatric symptoms that currently interfere with further development within the Clubhouse. Clubhouse staff perform outreach to enrollees when they do not attend the Clubhouse and may need assistance. Enrollees attend at least four times per month. • Enhanced Support: This pertains to enrollees who require a combination of Clubhouse visits and intensive in-home support. Activities in the home/community may include: medication monitoring, mental status exam, and supportive counseling and coordination with the treating psychiatrist. Enrollees will receive this service as their individual needs require. All staff activity will be documented in the enrollee's file. Minimum contacts are fourteen per month within the home/community or Clubhouse. • High level: Enrollees at this level of Clubhouse are actively involved in the daily routine. They participate in and lead unit meetings. They have a good knowledge of the Clubhouse model and participate in the

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>service may also be used to facilitate cognitive and socialization skills necessary for functioning in a work environment focusing on maximum recovery and independence.</p> <p>Common Settings:</p> <ul style="list-style-type: none"> • Clubhouses shall include an individual space that allows for the growth of its unique philosophy. This includes office/kitchen space to perform the work of the clubhouse. It can also include a thrift store to allow maximum member opportunity for work. • Clubhouse activity extends to off-site through Transitional Employment Placements (TEP) where the enrollee can access 	<p>family enrollees.</p> <p>7. An individualized crisis plan should be developed for each enrollee.</p> <p>The ICCD “Standards for Clubhouse Programs” can be viewed at www.iccd.org.</p>	<p>work-ordered day. They may assist other enrollees in participating in the Clubhouse and provide direct member-to-member assistance with budgeting, cooking or cleaning skills. Enrollees have an increased sense of confidence and take pride in their work. Enrollees at this level attend the Clubhouse at least eight times per month.</p> <ul style="list-style-type: none"> • Transitional Employment (TE) level: Enrollees at this level have evolved from the work-ordered day within the Clubhouse and are ready to attempt a TE placement. This placement may last up to six months and is designed to increase the enrollee’s confidence in their community work skills. Enrollees are given the opportunity to participate in a TE placement that is low stress and fairly routine for a maximum of 20 hours per week. Clubhouse staff assist in training and provide ongoing support to the enrollee. Clubhouse staff also act as a replacement worker if necessary. Enrollees attend the Clubhouse at least four times per month. • Graduate Level: Enrollees have completed at least one TE placement and are involved in community work. They return to the Clubhouse occasionally to stay connected socially to other enrollees and to offer support to other enrollees. They return once per month for an employment support meeting at the Clubhouse. • Maintenance Level: This level is for enrollees who have tried other levels within the Clubhouse and are engaged minimally in the Clubhouse. These enrollees are offered Motivational Interviewing strategies to bring them into a treatment level of engagement. <p>Continued Stay Criteria (Must meet both of the following):</p> <ol style="list-style-type: none"> 1. Continue to meet medical necessity criteria for this level of care. 2. Meet requirements of particular level authorized/provided. <p>Exclusion Criteria: (Any one of the following)</p> <ol style="list-style-type: none"> 1. Enrollee is under 16 years of age. 2. Enrollee’s identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis of one of the following ICD-9-CM codes: 290.0-290.43, 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 3. Enrollee does not have the intent of nor is capable of moving toward independent living. 4. Enrollee’s symptoms include imminent risk of potential harm to self, others or property. 5. Enrollee has not received medical clearance to participate due to unstable medical conditions.

IV. COMMUNITY MENTAL HEALTH SERVICES

f. Therapeutic Behavioral On-Site Services - Child and Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Therapeutic Behavioral On-Site Services for Children and Adolescents are designed to assist children who have complex needs as well as their families, in an effort to prevent a more intensive and restrictive behavioral health placement. Coverage must include the provision of these services outside of the traditional office setting. The process must be driven by assessment of the individual needs and strengths of each enrollee and family, and be developed and directed by a treatment team.</p> <p>Therapeutic Behavioral Health On-site Services are comprehensive outpatient services delivered where the child is living, working, or participating in educational activities. These services provide a full range of intensity to the enrollee in his/her natural setting, depending on the need of the enrollee. Therapeutic Behavioral Health On-site Services include therapy services, behavior management services and therapeutic support services. These services may not be provided in a psychiatric hospital, a psychiatric unit of a general hospital, a crisis stabilization unit, or any other setting where the same services are already being paid for by another source.</p> <p>In considering the intensity of Therapeutic Behavioral Health Services, the delivery of these services involves three basic elements: severity of problem, appropriate intensity of service, and the least restrictive and/or intrusive service necessary.</p> <p>Common Service Types:</p> <p>Therapeutic Behavioral On-Site Services are community services and natural supports for children with serious emotional disturbances. Clinical services include the provision of a professional level therapeutic service that may include the teaching of problem solving skills, behavioral strategies, normalization activities and other treatment modalities that are determined to be medically necessary. These services should be designed to maximize strengths and reduce behavior problems or functional deficits stemming from the existence of a mental health disorder. Social services include interventions designed for the restoration, modification and maintenance of social, personal adjustment and basic living skills. Inherent in the concept of Therapeutic Behavioral On-Site Services is that they are developed and tailored specifically</p>	<p>Admission Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Complete biopsychosocial strengths-based assessment following Best Practice Guidelines either included in or accompanying a psychological or psychiatric evaluation. 2. Development of an individualized, strengths - based treatment plan which includes specific achievable, behaviorally based and objective treatment goals. Goals directly address the problems that resulted in the need for treatment and build on the enrollee's and his/her family's strengths. Treatment goals describe the roles that will be taken by all relevant participants in addition to the enrollee (e.g., family enrollees, school staff, if relevant, etc).. 3. Services are supervised by a qualified health professional. <ol style="list-style-type: none"> a. Therapy services must be provided by a master's level practitioner supervised by a licensed practitioner of the healing arts. b. Management services must be provided by a certified behavior analyst or certified associate behavioral analyst, working as a member of the enrollee's treatment team. c. On-site therapeutic support services must be provided, at a minimum, by a behavioral health technician supervised by a master's level practitioner. 4. There is documented commitment by the primary care givers (usually parent/guardian) to the therapeutic plan. 5. The treatment team must include the enrollee and family, other persons who provide natural, 	<p>Admission Criteria (Must meet 1 through 3; OR 3 through 6)</p> <ol style="list-style-type: none"> 1. The enrollee has received a psychological or psychiatric evaluation that supports an ICD-9-CM diagnosis of: 294.8, 294.9, 300 through 305.9, 307.1, 307.5 through 307.7, 308.0 through 312.4, and 312.81 through 314.9 2. The child/adolescent is enrolled in a special education program for the seriously emotionally disturbed (SED) or the emotionally handicapped; or has scored 60 or below on the Axis V Children's Global Assessment of Functioning Scale within the last six (6) months. 3. Services are recommended by a service planning team which always includes the family; the enrollee if appropriate; other persons who provide natural, informal support to the family; treatment providers; and representatives from other involved systems to the degree possible. 4. Prior to receipt of services, a licensed practitioner of the healing arts experienced in the diagnosis of behavioral health disorders has documented the enrollee has an ICD-9-CM diagnosis of 295 through 298.9 or 303.0 through 305.9. 5. There is adequate evidence to indicate that the enrollee is at risk for a more intensive, restrictive and costly behavioral health placement; 6. Treatment at a lower level of care has been given serious consideration and there is adequate evidence to indicate that the enrollee's condition and functional level cannot be improved with a less intensive service. <p>Continued Stay Criteria (Must meet 1 through 4 and either 5 or 6)</p> <ol style="list-style-type: none"> 1. Enrollee continues to meet the criteria defined in above Admission Criteria. 2. There is a reasonable expectation that the enrollee will benefit from the continuation of Home/Community Services.

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>to meet individualized enrollee and family needs.</p> <p>Therapy</p> <p>Therapeutic behavioral therapy services include a clinical assessment of mental health, substance abuse or behavioral disorders to determine treatment needs. An assessment and implementation plan is created with the enrollee and his/her family to incorporate the child or adolescents' natural support system. These services also provide development, implementation, and monitoring of behavior programming for the enrollee as well as individual and family therapy as needed.</p> <p>Behavior Management Services</p> <p>Behavior management services provide an assessment of behavior problems, and functions of these problems and related skill deficits and assets. This assessment also identifies primary and other important caregiver skill deficits and assets related to the enrollee's behaviors and the interactions that will motivate, maintain or improve behavior.</p> <p>Behavior management services will develop and coordinate efforts for an individual behavior plan with measurable goals and objectives. The team will provide training for caregivers and others involved with the enrollee in the implementation and monitoring of the behavior plan and revise as needed.</p> <p>Therapeutic Support Services</p> <p>Therapeutic support services must be related to the enrollee's treatment plan goals and objectives and must include one or more of the following:</p> <ul style="list-style-type: none"> • One-to-one supervision and intervention with the enrollee during therapeutic activities in accordance with the treatment plan; • Skill training of the enrollee for restoration of those basic living and social skills necessary to function in the enrollee's own environment; • Assistance to the enrollee and family in implementing the behavioral goals identified through family counseling and development of the treatment plan. 	<p>informal support to the family system and the professionals involved in providing services. The child-specific plan for therapeutic behavioral on-site services must be based on a thorough assessment, with information from the enrollee and family, regarding needs, strengths and desired outcomes of services. When indicated by the assessment, and agreed to by the family, the plan must reflect referral to, and coordination with, other agencies and resources. It is recognized that involvement of the family in the treatment of the enrollee is necessary and appropriate. Provision of therapeutic behavioral on-site services with the family must clearly be directed toward meeting the identified treatment needs of the enrollee.</p> <p>Continued Stay Service Components</p> <ol style="list-style-type: none"> 1. Treatment is in process of implementation 2. Active and timely treatment is focused upon stabilizing or reversing symptoms for which treatment was initiated (or prescribed). 3. Interventions are consistent with the enrollee's risk factors and assessment. 4. Treatment plan and service hours have been adjusted to reflect the enrollee/family's progress. 5. Routine assessments and treatment progress updates are completed. 6. Enrollee and family, to the extent possible, are involved in treatment and discharge planning. <p>Continued Stay Documentation Requirement</p> <p>Within six months of the original determination of eligibility for services and every six months thereafter, the members of the enrollee's treatment team must document that the enrollee continues to meet the eligibility criteria stated above. Services may be authorized for less than six months</p>	<ol style="list-style-type: none"> 3. Treatment promotes developmentally appropriate behavior, activities, skills and social skills for the enrollee in his/her natural context through focusing on his/her individual strengths and needs. 4. Techniques are employed in treatment that are time limited in nature and subordinate to a goal of enhanced autonomy. 5. Appearance of new problems or symptoms which meet admission guidelines. 6. Enrollee requires the continuation of a treatment support system while in the community until an effective family and community support network can be activated. <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee's identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis of one of the following ICD-9-CM codes: 294.8, 294.9, 295 through 298.9, 300 through 305.9, 307.1, 307.5 through 307.7, 308.0 through 312.4, and 312.81 through 314.9. 2. Site of service is not where the primary problems or behaviors of the psychiatric diagnosis are manifested. 3. Enrollee is simultaneously receiving similar therapeutic services of equal or greater intensity via another resource, <p>Discharge Criteria (Must meet <i>all</i> of the following):</p> <ol style="list-style-type: none"> 1. Enrollee no longer meets Continued Stay Criteria. 2. Enrollee meets the individualized discharge criteria. Within 45 days of admission to therapeutic behavioral on-site services, a plan must be developed with each enrollee and family, which contains specific discharge criteria. The discharge plan must be placed in the enrollee's clinical record.

IV. COMMUNITY MENTAL HEALTH SERVICES

g. Self-Help/Peer Services- Adult

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Peer Support interventions are collegial services delivered in the community such as the enrollee's home or residence and/or community settings. The services are targeted toward the support of an enrollee with a serious and persistent mental illness. Such services are supportive and may be rehabilitative in focus and are initiated when there is a reasonable likelihood that such services will benefit the enrollee's functioning and assist him/her in maintaining community tenure.</p> <p>Examples:</p> <ul style="list-style-type: none"> • Person-to-Person Peer Support • Telephonic Support • Peer Supervision in community-based settings 	<p>Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. A peer support program will provide services directly by consumers of mental health services, including at a minimum: <ol style="list-style-type: none"> a. Adults eighteen and over who have been consumers of mental health services. b. Adults who are presently stable regarding their mental illness. c. Adults who have advanced in their mental health recovery plan and have been approved by their physician to perform this service. 2. Services are directly supervised by mental health professionals who are licensed at the independent practice level. Services are provided by Magellan-credentialed organizational providers. <ol style="list-style-type: none"> a. An independently, Florida licensed mental health professional must be available by phone to Peer Support providers on a 24-hour basis. b. A minimum of bi-weekly supervision meeting must be provided to Peer Support providers by licensed mental health professionals (Supervision must encompass mental health issues that affect those with a serious and persistent mental illness and substance abuse disorders.) c. Supervision provided must be within the scope of practice and licensure for the mental health professional. d. Peer support providers must have access 	<p>Admission Criteria (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Validated principal DSM-IV-TR Axis or II Diagnosis. 2. Level of Stability (Must meet a, b, c and d) <ol style="list-style-type: none"> a. Enrollee is presently under the psychiatric care of a board-eligible psychiatrist or other qualified physician. b. Risk to self, others, or property is considered to be low. If risk to self, others, or property is present, it is determined that this can be managed by the current clinical team within the enrollee's existing environment. c. The enrollee is medically stable and does not require a level of care that includes more intensive medical monitoring. If not medically stable, then the enrollee has the necessary medical resources to medically stabilize. d. Enrollee is accepting of this intervention. 3. Degree of Impairment (Must meet a and b) <ol style="list-style-type: none"> a. Enrollee has demonstrated a need for assistance in community living. An assessment has been made that this intervention will not interfere with the present treatment plan. b. Social/Interpersonal/Familial/ - An assessment has been made that this intervention will assist in these functioning areas for enrollees who are served. <p>Continued Stay Criteria (Must meet 1 through 3)</p> <ol style="list-style-type: none"> 1. Validated DSM-IV-TR I or II diagnosis. 2. There is a reasonable expectation that the enrollee will benefit from the Peer Support Program. 3. Enrollee continues to express a desire to continue with this intervention.

IV. COMMUNITY MENTAL HEALTH SERVICES

h. Crisis Intervention Mental Health Services and Post-Stabilization Services- Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Crisis Intervention Mental Health Services and Post-Stabilization Services are mobile assessment, referral, intervention and triage services that can occur in any one of a number of settings. These settings include the enrollee's home, residential placement settings, outpatient clinics, foster homes, inpatient medical units, etc. Crisis Intervention services include intervention activities of less than 24-hour duration (within a 24-hour period) designed to stabilize an enrollee in a psychiatric emergency.</p> <p>Should the mobile intervention not be sufficient to stabilize the enrollee, a determination will be made regarding the immediate initiation of a more intensive level of care.</p> <p>Post-stabilization care services include any of the mandatory services that a treating physician views as medically necessary, that are provided after an enrollee is stabilized from an emergency mental health condition in order to maintain the stabilized condition, or under the circumstances described in 42 CFR 438.114(e) to improve or resolve the enrollee's condition.</p> <p>Crisis intervention services may be utilized at various points in the enrollee's course of treatment and recovery. Each intervention, however, is intended to be a discreet, time-limited (e.g., less than 24 hours for crisis intervention) service which stabilizes the enrollee and moves him/her to post-stabilization services, prior to returning to more routine level of care services.</p> <p>Common Settings:</p> <ul style="list-style-type: none"> • Mobile Crisis Team • Field Evaluation Services 	<p>Admission Service Components</p> <ol style="list-style-type: none"> 1. Setting must have the capability to provide for safe environment during the intervention. 2. Professional staff <ol style="list-style-type: none"> a. Psychiatric consultation must be immediately available to the crisis intervention mental health professional. b. Crisis Intervention services must be provided by licensed or certified qualified mental health professionals or must be provided by an appropriately qualified mental health professional under the direct supervision of a licensed or certified mental health professional. c. When appropriate, such services should be clinically supervised by a licensed physician, psychologist (Ph.D.) or social worker; in such instances documentation should be reviewed and co-signed by the supervisor. d. Services must be provided within the applicable scope of practice guidelines. 3. Level of skilled intervention must be consistent with enrollee risk. 4. Crisis response must include: diagnostic interview, risk assessment, Mental Status Exam, family evaluation, review of records, consultation with other professionals, therapeutic interventions with enrollees and families, immediate disposition or short-range treatment planning to resolve the crisis, and Case Management/linkage to appropriate level of care. 5. Crisis services, including 24-hour telephonic access must be available. 	<p>Admission Criteria (Must meet 1-4)</p> <ol style="list-style-type: none"> 1. A known or suspected principal ICD-9-CM Axis I or II diagnosis of one of the following: 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9. 2. Treatment at a lower level of care has been attempted <u>or</u> given serious consideration and is determined to be clinically inappropriate. 3. Level of Stability - (Must meet a and b) <ol style="list-style-type: none"> a. Risk to self, others and/or property is present. Risk may range from likely to imminent. b. The immediate response is to conduct a thorough assessment of risk, mental status, psychosocial functioning and medical stability, and if necessary, to intervene immediately to de-escalate the crisis. 4. Degree of Impairment - (Must meet a and b) <ol style="list-style-type: none"> a. Enrollee has insufficient or severely limited resources or skills necessary to cope with the immediate crisis. b. Enrollee demonstrates impaired judgment and/or lack of impulse control and/or cognitive/perceptual abilities apparently arising from a psychiatric condition or chemical dependence. <p>Continued Stay Criteria</p> <ol style="list-style-type: none"> 1. Crisis intervention services may be utilized at various points in the enrollee's course of treatment and recovery. Each intervention, however, is intended to be a discreet, time-limited (e.g., less than 24 hours for crisis intervention) service which stabilizes the enrollee and moves him/her to the post-stabilization services, prior to returning to more routine level of care services. <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee's identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis of one of the following: 290.0-290.43, 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 2. Enrollee can safely be transported to appropriate treatment setting to address the enrollee's clinical needs. 3. Enrollee's current situation does not significantly compromise the enrollee's

Post-stabilization services must be readily available to maintain the enrollee's stabilization or continue to help the enrollee improve his/her condition.</p> <p><i>Continued Stay Service Components not applicable</i></p>	<p>environment or family function, whereupon removal from the environment is necessary.</p> <p>4. Enrollee's situation is of a severity that inpatient services are necessary.</p> <p>Discharge Criteria</p> <p>1. Enrollee no longer meets medical necessity for this level of care.</p>

IV. COMMUNITY MENTAL HEALTH SERVICES

i. Substance Abuse Services—Adult and Child/Adolescent

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Substance Abuse Services</p> <p>Enrollees will receive Medicaid-funded substance abuse services through the fee-for-service system. Magellan care managers will use the Florida Supplement to the ASAM PPC-2R to assist enrollees in obtaining and locating needed services in this area.</p>	<p>Magellan will offer linkages to substance abuse providers and will coordinate and integrate care with mental health and substance abuse treatment. Coordination will be reflected in the Individualized Treatment Plan for enrollees with co-occurring disorders.</p>	<p>The Florida Supplement to the ASAM PPC-IIR is used for the coordination of mental health treatment with substance abuse providers.</p>

V. MENTAL HEALTH TARGETED CASE MANAGEMENT

a. Adult

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Mental Health Targeted Case Management Services are direct outpatient services delivered in the enrollee's home or residence and/or community setting. These services are directed toward the rehabilitation of behavioral/social/emotional deficits and/or amelioration of symptoms for adults with serious and persistent mental illness. Such services are designed to provide assistance to priority- population enrollees in accessing needed resources and services in order to achieve stability in the community.</p> <p>Mental Health Targeted Case Management Services are similar to Intensive Case Management (ICM) in that the activities are the same. It differs in level of intensity and is targeted for enrollees with less complex needs.</p>	<p>Admission Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Services are organized as a separate service, meet the Mental Health Targeted Case Management Coverage and Limitations Handbook requirements and are supervised by a qualified mental health professional. <ol style="list-style-type: none"> a. The supervisor (if certified on or after July 1, 1999) either has a master's degree or a bachelor's degree with five years of case management experience and case management training required by the Department of Children and Families. b. Case Management program workers are supervised closely and services provided are within the workers scope of training and experience. c. Services are coordinated with the enrollee's mental health therapist or psychiatrist (when enrollee is receiving such services), and involved others. d. Formal and informal linkages with other services providers are established to carry out Case Management functions. 2. Complete biopsychosocial assessment including, but not limited to relevant history, education or employment, social skills, independent living skills, previous treatment, current medical conditions (including medications), substance abuse history, lethality assessment and a complete Mental Status Exam. 3. Development of an individualized strengths-based, targeted, focused treatment plan directed toward the reduction or alleviation of the impairment that resulted in the enrollee seeking services. The plan must reflect the least restrictive, most efficacious 	<p>Admission Criteria (Must meet 1 through 8; or 9)</p> <ol style="list-style-type: none"> 1. Enrolled in a Department of Children and Families adult mental health target population; 2. Has a disability which requires advocacy for and coordination of services to maintain or improve level of functioning; 3. Requires services to assist in attaining self sufficiency and satisfaction in the living, learning, work, and social environments of choice; 4. Lacks a natural support system with the ability to access needed medical, social, educational, and other services; 5. Requires ongoing assistance to access or maintain needed care consistently with the service delivery system; 6. Has a disability duration that, based upon professional judgment, will last for a minimum of one year; 7. Not receiving duplicate Case Management services from another provider; and 8. Meets at least one of the following requirements: <ol style="list-style-type: none"> a. Awaiting admission to or has been discharged from a state mental hospital, b. Has been discharged from a mental health residential treatment facility, c. Has had more than one admission to a crisis stabilization unit (CSU), short-term residential facility (SRT), inpatient psychiatric unit, or any combination of these facilities; d. At risk of institutionalization for mental health reasons; or e. Experiencing long-term or acute episodes of mental health impairment that may put him or her at risk for requiring more intensive services. <p style="text-align: center;">Or</p> 9. Has relocated from a Department of Children and Families district where enrollee was receiving mental health targeted Case Management services. <p>Continued Stay Criteria (Must meet 1 through 4)</p> <ol style="list-style-type: none"> 1. Enrollee continues to meet medical necessity criteria for this level of care.. 2. There is a reasonable expectation that the enrollee will benefit from continuing Case Management. This is observable as a positive or beneficial response to

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	<p>services available.</p> <ol style="list-style-type: none"> 4. Development of specific, achievable, behavioral-based and objective goals which directly address the programs that resulted in the enrollee seeking services. 5. Service plan developed by the resource coordinator with the enrollee, and family which includes: <ol style="list-style-type: none"> a. Documented assessment of the enrollee's strengths and needs. b. Specific goals, objectives, responsible persons, time frames for completion and the case manager's role in relating to the enrollee and involved others. c. Signatures of the enrollee, the case manager and the case manager's supervisor. 6. Assistance provided in linking with services, gaining access to services, monitoring the delivery of services, problem resolution, use of community resources, and network building. <p>Continued Stay Criteria (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Written Case Management plan has been implemented, and modified to reflect enrollee's progress and/or new information. 2. Active and timely services are being provided where the enrollee resides or needs service. 3. Face-to face contact is made at least every month for an adult enrollee. 4. Interventions are consistent with the enrollee's service plan and demonstrate enrollee is accessing services and needed resources or is exhibiting improved functioning with Case Management Services. 	<p>services which may include, but are not limited to:</p> <ol style="list-style-type: none"> a. Consistently attending scheduled therapy sessions/Case Management meetings, b. Independent living and community integration, c. Vocational/educational participation, d. VI. INTENSIVE CASE MANAGEMENT- ADULT

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Intensive Case Management (ICM) Services are direct outpatient services delivered in the enrollee's home or residence and/or community setting. These services are directed toward the rehabilitation of behavioral/social/emotional deficits and/or amelioration of systems for highly recidivistic adults with serious and persistent mental illness. Such services are designed to provide assistance to priority population enrollees in accessing needed resources and services in order to achieve stability in the community and avoid institutional care. Intensive Case Management provides services through the use of a team of case managers and, if needed, other specialists qualified to address identified needs.</p> <p>Common Settings:</p> <p>Intensive Case Management</p>	<p>Admission Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Services are organized as a separate service, meet the Mental Health Targeted Case Management Coverage and Limitations Handbook requirements and are supervised by a qualified mental health professional as follows: <ol style="list-style-type: none"> a. The supervisor (if certified on or after July 1, 1999) either has a master's degree or a bachelor's degree with five years of case management experience and case management training required by the Department of Children and Families. b. Unlicensed program workers are supervised closely and services provided are within the workers scope of training and experience. c. Services are coordinated with the enrollee's mental health therapist or psychiatrist (when enrollee is receiving such services) and consultation is provided in crisis situations, overall treatment and care management, and in discharge planning. d. Services are provided when an enrollee is being considered for involuntary commitment. e. Formal and informal linkages with other services providers are established to carry out ICM activities. f. Services are available on a 24 hours, 7-day per week basis. 2. Complete biopsychosocial assessment including, but not limited to relevant history, education or employment, social skills, independent living skills, previous treatment, current medical conditions (including medications), substance abuse history, lethality assessment and a complete Mental Status Exam. 3. Development of an individualized strengths-based, targeted, focused plan directed toward the reduction or alleviation of the impairment that resulted in the enrollee seeking services. The plan must reflect the least restrictive, 	<p>Admission Criteria (Must meet both 1 and 2 AND either 3-9 or 10)</p> <ol style="list-style-type: none"> 1. The criteria for adults with serious and persistent mental illness. 2. Meets at least one of the following requirements: <ol style="list-style-type: none"> a. Has resided in a state mental hospital for at least 6 months in the past 36 months; b. Resides in the community and has had two or more admissions to a state mental hospital in the past 36 months; c. Resides in the community and has had three or more admissions to a crisis stabilization unit (CSU), and/or 24-hour level of care settings within the past 12 months. d. Resides in the community and, due to a mental illness, exhibits behavior or symptoms that could result in long-term hospitalization if frequent interventions for an extended period of time were not provided or; e. Has relocated from a Department of Children and Families districts where he or she was receiving intensive Case Management team services. 3. Enrolled in a Department of Children and Families adult mental health target population; 4. Has a disability which requires advocacy for and coordination of services to maintain or improve level of functioning; 5. Requires services to assist in attaining self sufficiency and satisfaction in the living, learning, work, and social environments of choice; 6. Lacks a natural support system with the ability to access needed medical, social, educational, and other services; 7. Requires ongoing assistance to access or maintain needed care consistently with the service delivery system; 8. Has a disability duration that, based upon professional judgment, will last for a minimum of one year; 9. Not receiving duplicate Case Management services from another provider. 10. Meets at least one of the following requirements:

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
	<p>most efficacious services available.</p> <ol style="list-style-type: none"> 4. Development of specific, achievable, behavioral-based and objective goals which directly address the programs that resulted in the enrollee seeking services. 5. Experiencing long-term or acute episodes of mental impairment that may put him or her at risk for requiring more intensive services. <p>Continued Stay Criteria (Must meet 1 through 4)</p> <ol style="list-style-type: none"> 1. Enrollee continues to meet criteria defined in above Admission Criteria. 2. There is a reasonable expectation that the enrollee will benefit from continuing ICM services. This is observable as a positive or beneficial response to services which may include, but are not limited to: <ol style="list-style-type: none"> a. Consistently attending scheduled therapy sessions/ICM meetings, b. Independence of living for an adult enrollee, c. Vocational/educational participation, d. Reduced hospital lengths of stay, e. Reduced use of crisis-only services. 3. Enrollee is making progress to the extent possible toward goals and is benefiting from the service plan as evidenced by lessening of symptoms and stabilization of psychosocial functioning through ICM services, or removal of ICM services would result in enrollee's destabilization. 4. Techniques employed in ICM are time limited in nature and subordinate to a goal of enhanced enrollee autonomy. <p>Exclusion Criteria (Any one of the following)</p> <ol style="list-style-type: none"> 1. Enrollee does not accept ICM service. 2. ICM not endorsed by enrollee's primary mental health providers and enrollee not willing to seek alternative sources. 3. Receiving duplicative case management services from another provider. 4. Enrollee is currently in a supervised living setting or treatment plan includes

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
		<p>return to a supervised living setting (e.g., residential treatment).</p> <p>5. Enrolled in FACT.</p> <p>Discharge Criteria (Must meet 1 and 2)</p> <p>1. Enrollee no longer meets continued stay criteria.</p> <p>2. A discharge plan had been developed including:</p> <ul style="list-style-type: none"> a. A recommended aftercare plan which contains the signature of the enrollee, involved others, and the signature of the county administrator if the child/family does not consent to termination, b. A transition session is scheduled with the aftercare interagency team.

VII. RESPITE—ADULT AND CHILD/ADOLESCENT

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>In/Out of Home Respite are community and home-based services and can be provided in a variety of settings. Respite services are for short-term environmental/symptom stabilization related to mental health symptoms. Such services are intended to be used for one to three continuous twenty-four (24) hour periods, not to exceed 72 hours. Services are provided by professional or paraprofessional staff in a safe environment.</p> <p>In/Out of Home Respite can be planned or in response to an urgent need for an environmental intervention. Medical and psychiatric services are readily accessible.</p> <p>Planned respite should be part of a community-based treatment plan that includes Magellan clinical staff and all appropriate parties, including the enrollee/family/guardian. Appropriate respite should be provided for the support of a reduction in mental health symptoms that may be promoted by the alternative environment.</p> <p>Out of Home Respite Examples:</p> <ul style="list-style-type: none"> • Shelters • Respite Homes <p>In Home Respite Examples:</p> <ul style="list-style-type: none"> • Enrollee Home Environment • Family/Caregiver/Guardian Home Environment 	<p>Service Components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. A Plan Respite provider is licensed at the 24 hour care level by the State and staff must have access to a Florida-licensed independent mental health professional. 2. Staff <ol style="list-style-type: none"> a. Basic training in mental health symptomatology. b. Emergency response training, (i.e., CPR). c. Training in crisis identification and response procedures. 3. Available bed(s) and designated staff assigned for 24 hour supervision. 4. Ability to coordinate with other providers regarding the treatment and discharge planning of enrollees in respite care. 5. A licensed independent mental health practitioner on-call 24 hours per day, seven days per week. Individual(s) should be employed or contracted with the in/out-of-home respite provider; and/ or enrollee's psychiatrist or other licensed physician who is available by phone for consultation 24 hours per day, seven days per week. 6. Continuous documentation of enrollee activities/progress and any Case Management activity while in respite care. All notes co-signed by the appropriate clinical health staff. 7. Immediate access to local hospital/emergency care under the care of a licensed psychiatrist. 	<p>Admission Criteria</p> <ol style="list-style-type: none"> 1. Outpatient services will not meet the family's needs for support and education 2. Family and caregivers are unable to participate in the normal activities of daily life in the community as a result of caring for the enrollee, thus putting the enrollee at risk for out-of-home service level beyond the scope of Respite Care. <p>Continued Stay Criteria</p> <p>N/A</p> <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee is residing in a licensed therapeutic foster care home or specialized therapeutic foster care home. 2. Enrollee meets the criteria for a more or less intensive and restrictive level of care. 3. Enrollee is at risk to harm self, others or property. 4. Enrollee has medical condition(s) that prevent utilization of Respite care. <p>Discharge Criteria (Either of the following):</p> <ol style="list-style-type: none"> 1. Treatment plan goals and objectives have been substantially met. 2. Enrollee meets criteria for a more or less intensive and restrictive level of care.

VIII. SUPPORT GROUP SERVICES - ADULT AND CHILD/ADOLESCENT

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>This service is designed for parents or caregivers of children with serious emotional disturbance or for parent/caregivers of adults with severe and persistent mental illness.</p> <p>The service, self-help groups for parents or caregivers, is based on the belief that caregivers of individuals with serious mental illness can help each other through mutual support. Most groups are led by parents, but may be led by a professional.</p> <p>These groups may be operated by NAMI, other advocacy groups, community mental health agencies, or developed by parents of children with mental illness.</p>	<p>Support groups are often time-limited but may be open-ended. There is usually an educational component to the meetings in addition to emotional support.</p> <p>Service Components (Must meet <i>all</i> of the following)</p> <p>The leader:</p> <ol style="list-style-type: none"> 1. Is either a trained parent or mental health professional. 2. Engages participants with warmth, understanding, and attention to enrollee's needs and desires. 3. Focuses conversation on family and enrollees' strengths and is cultural-competent. 4. Helps participants identify problems and find appropriate and constructive solutions. 5. Helps participants locate other necessary resources, support, and treatment. 	<p>Admission Criteria (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. Enrollee is the parent or caregiver of a child with serious emotional disturbance or is the parent/caregiver or an adult with severe and persistent mental illness. 2. Caregiver may be anyone who provides direct support and is actively involved in caring for the enrollee. The enrollee does not have to be a relative or a person sharing the same living space. <p>Continued Stay Criteria: Do not apply.</p> <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. The leader can require participants to withdraw from the group if they are excessively disruptive or demonstrate aggressive behaviors towards other group participants. 2. The parent or caregiver declines to participate in the group. <p>Discharge Criteria (Either of the following)</p> <ol style="list-style-type: none"> 1. The parent or caregiver has maximized benefit from the group. 2. The parent or caregiver is no longer interested in participating in the group.

IX. FAMILY PSYCHOEDUCATION - ADULT

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>An evidence-based treatment approach to assist family members with individuals with serious mental illness to help decrease stress and tension in the family, to promote social support, and to establish a collaborative relationship between the treatment team and family.</p> <p>Psycho-education is the main component of a family intervention program. By assisting family members in understanding the nature of mental illness, they can more effectively support the enrollee.</p> <p>Common service settings</p> <ul style="list-style-type: none"> • May be incorporated in case management. • May be conducted by trained family members through NAMI. 	<p>Service components (Must meet <i>all</i> of the following)</p> <p><i>Curriculum and content</i></p> <p>Psycho-education can be used in a single family or multifamily group format, depending on the enrollee's and family's wishes. Single and multifamily group versions both should have the following components: similar components.</p> <p>The leader:</p> <ol style="list-style-type: none"> 1. engages program participants with warmth, empathy, and acceptance, and with attention to each individual's needs and desires. 2. identifies and specifies the family's reaction to the relative's mental illness. 3. identifies and specifies precipitating factors to the relative's mental illness. 4. helps families to identify and specify prodromal signs and symptoms of their relative's mental illness. 5. helps to identify, describe, clarify, and teach coping strategies that are used by families. 6. uses a standardized curriculum to teach families about mental illness. The curriculum covers at least six topics: psychobiology, diagnosis, treatment and rehabilitation, family reactions to the enrollee's experience of psychosis, relapse prevention, and family guidelines. 7. provides educational materials on mental illness treatment, and guidelines, with choices in several formats (e.g., written, video, Web sites). 8. follows a structured procedure that includes socialization, go-round, response to each family, problem solving, and socialization. 9. teaches a standardized approach to problem solving (identify the problem, define the problem for one patient/family, generate more than seven solutions, review pros and cons, select a solution, develop specific and individualized tasks and plans to help families increase their problem-solving skills). <p><i>Leaders</i></p> <p>Family psycho-education sessions can be led by:</p> <ol style="list-style-type: none"> 1. a licensed, qualified mental health professional; 2. trained family members, such as individuals trained to lead the Family-to-Family program through NAMI; 	<p>Admission Criteria (Must meet <i>any</i> of the following)</p> <ol style="list-style-type: none"> 1. Family members or caregivers of enrollees with a current, validated diagnosis of a serious mental illness or severe emotional disturbance. 2. Family members can be anyone who provides direct support and is actively involved in caring for the enrollee. The person does not have to be a relative or a person sharing the same living space. 3. Family members of enrollees who are at an early stage of their illness are particularly encouraged to participate, because literature on family psycho-education has shown that this intervention has especially promising outcomes for these enrollees' symptoms and employment. <p>Continued Stay Criteria</p> <p>Do not apply.</p> <p>Exclusion Criteria (Either of the following)</p> <ol style="list-style-type: none"> 1. The leader can require participants to withdraw from the program if they are excessively disruptive or demonstrate aggressive behaviors toward other program participants. 2. The family member declines to participate in the program. <p>Discharge Criteria (Either of the following)</p> <ol style="list-style-type: none"> 1. The participant is no longer interested in participating in the family psycho-education sessions. 2. The participant has met the learning and educational objectives of the program.

X. ILLNESS MANAGEMENT AND RECOVERY—ADULT

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Illness management and recovery programs consists of a series of weekly sessions in which specially trained mental health practitioners help enrollees develop customized strategies for coping with symptoms and toward recovery. This is an evidence-based treatment approach designed to assist adults with serious mental illness improve the skills needed to manage their mental illness effectively and reduce symptoms and episodes of relapse. Enrollees also learn to manage and reduce stress and understand medication side effects.</p> <p>Common settings</p> <ul style="list-style-type: none"> • community-based; • may be incorporated into psychosocial rehabilitation services. 	<p>The program may be provided individually, but is usually in group format and generally lasts between three and six months. There are four main interventions: psycho-education, social skills training, coping skills training and cognitive therapy techniques.</p> <p>Service components (Must meet <i>all</i> of the following)</p> <ol style="list-style-type: none"> 1. The goals of the program include: <ol style="list-style-type: none"> a. learning about mental illness and strategies for treatment; b. decreasing symptoms; c. reducing relapse and re-hospitalizations; and d. making progress toward enrollee’s goals and toward recovery. 2. The leader will: <ol style="list-style-type: none"> a. be specially trained in leading illness management and recovery programs; b. provide educational material, including handouts; c. help enrollees apply the content of the material to develop individual strategies for managing mental illness and setting and achieving goals; and d. give enrollees the opportunity to practice strategies during the meeting and in every day life. 3. Information to be covered during the program includes: <ol style="list-style-type: none"> a. recovery strategies; b. practical facts about mental illness; c. building social support; d. reducing relapse; e. using medications effectively; f. coping with stress, problems, and symptoms; and g. getting one’s needs met in the mental health system. 	<p>Admission Criteria (Must meet 1 through 3)</p> <ol style="list-style-type: none"> 1. The enrollee must have a documented mental health diagnosis that qualifies as an SPMI. 2. The level of intervention is consistent with current enrollee risk factors. 3. The leader assesses that the enrollee can benefit from the program. <p>Continued Stay Criteria</p> <p>Do not apply.</p> <p>Exclusion Criteria (Any one of the following)</p> <ol style="list-style-type: none"> 1. The leader can require participants to withdraw from the program if they are excessively disruptive or demonstrate aggressive behaviors toward other group participants. 2. The enrollee’s symptoms are too severe to allow active and constructive participation in the group. 3. The enrollee declines to participate in the group. <p>Discharge Criteria (Either of the following)</p> <ol style="list-style-type: none"> 1. The program has concluded its sessions. 2. The enrollee is no longer interested in participating in the program.

XI. PSYCHOLOGICAL TESTING

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Psychological testing is defined as the use of one or more standardized measurements, instruments or procedures to observe or record human behavior, and requires the application of appropriate normative data for interpretation or classification. Psychological testing may be used to guide differential diagnosis in the treatment of psychiatric disorders and disabilities. Testing may also be used to provide an assessment of cognitive and intellectual abilities, personality and emotional characteristics, and neuropsychological functioning.</p> <p>Testing may be completed at the onset of treatment to assist in the differential diagnosis and/or help resolve specific treatment planning questions. It also may occur later in treatment if the individual's condition has not progressed and there is no clear explanation for the lack of improvement.</p>	<p>Service Components</p> <ol style="list-style-type: none"> 1. Prior to psychological testing, the individual must be assessed by a qualified behavioral health care provider. The diagnostic interview determines the need for and extent of the psychological testing. 2. A licensed doctoral-level psychologist (Ph.D., Psy.D. or Ed.D.), or other qualified provider as permitted by applicable state and/or federal law, who is credentialed by and contracted with Magellan, administers the tests. 3. Requested tests must be valid and reliable, and the most recent version of the test must be used. The instrument must be age-appropriate and meet the individual's developmental, linguistics, and cultural requirements. <p><i>Continued Stay Service Components are not applicable.</i></p>	<p>Admission Criteria (must meet all of the following):</p> <ol style="list-style-type: none"> 1. The reason for testing must be based on a specific referral question or questions from the treating provider and related directly to the psychiatric or psychological treatment of the individual. 2. The specific referral question(s) cannot be answered adequately by means of clinical interview and/or behavioral observations. 3. The testing results based on the referral question(s) are reasonably expected to provide information that will effectively guide the course of treatment. <p>Continued Stay Criteria</p> <p>N/A</p> <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. The testing is primarily for educational or vocational purposes. 2. The testing is primarily for the purpose of determining if an individual is a candidate for a specific type or dosage of psychotropic medication. 3. Unless allowed by the individual's benefit plan, the testing is primarily for the purpose of determining if an individual is a candidate for a medical or surgical procedure. 4. The testing results could be invalid due to the influence of a substance, substance abuse, substance withdrawal, or any situation that would preclude valid psychological testing results from being obtained (e.g., an individual who is uncooperative or lacks the ability to comprehend the necessary directions for having psychological testing administered). 5. The testing is primarily for diagnosing Attention-Deficit Hyperactive Disorder (ADHD), unless the diagnostic interview, clinical observations, and results of appropriate behavioral rating scales are inconclusive. 6. Two or more tests are requested that measure the same functional domain. 7. Testing is primarily for legal purposes, including custody evaluations, parenting assessments, or other court or government ordered or requested testing. 8. Requested tests are experimental, antiquated, or not validated. 9. The testing request is made prior to the completion of a diagnostic interview by a

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
		<p>behavioral health provider, unless pre-approved by Magellan.</p> <p>10. The testing is primarily to determine the extent or type of neurological impairment, unless allowed by the individual's benefit plan.</p> <p>11. The number of hours requested for the administration, scoring, interpretation and reporting exceeds the generally accepted standard for the specific testing instrument(s), unless justified by particular testing circumstances.</p> <p>Discharge Criteria: N/A</p>

XII. MENTAL HEALTH 0-5

A. THERAPEUTIC BEHAVIORAL ON SITE SERVICES

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Therapeutic Behavioral On-Site Services for Children and Adolescents are designed to assist children who have complex needs as well as their families, in an effort to prevent a more intensive and restrictive behavioral health placement. Coverage must include the provision of these services outside of the traditional office setting. The process must be driven by assessment of the individual needs and strengths of each enrollee and family, and be developed and directed by a treatment team.</p> <p>Therapeutic Behavioral Health On-site Services are comprehensive outpatient services delivered where the child is living, working, or participating in educational activities. These services provide a full range of intensity to the enrollee in his/her natural setting, depending on the need of the enrollee. Therapeutic Behavioral Health On-site Services include therapy services, behavior management services and therapeutic support services. These services may not be provided in a psychiatric hospital, a psychiatric unit of a general hospital, a crisis stabilization unit, or any other setting where the same services are already being paid for by another source. In considering the intensity of Therapeutic Behavioral Health Services, the delivery of these services involves three basic elements: severity of problem, appropriate intensity of service, and the least restrictive and/or intrusive service necessary.</p> <p>Common Service Types: Therapeutic Behavioral On-Site Services are community services and natural supports for children with serious emotional disturbances.</p>	<p>Admission Service Components (Must meet all of the following):</p> <ol style="list-style-type: none"> 1. Prior to receiving any community behavioral health services, infants and children ages 0 through 5 years must have a current assessment (within a year) that meets the requirements listed below. For children ages 0-5 years, the assessment must include the following components: <ol style="list-style-type: none"> a. Presenting symptoms and behaviors; b. Developmental and medical history - history of pregnancy and delivery, past and current medical conditions and developmental milestones. c. Family psychosocial and medical history (may be as reported or based upon collateral information); d. Family functioning, cultural and communication patterns and current environmental conditions and stressors; e. Clinical interview with the primary caretaker and observation of the caregiver-infant (child) relationship and interactive patterns; f. Provider's observation and assessment of the child including affective, language, cognitive, motor, sensory, self-care and social functioning. 2. The assessment must include the elements outlined above and must be written in narrative form and provide detailed, individualized information on the components listed above. The sole use of checklists or fill in the blank forms is prohibited. 3. Development of an individualized, strengths - based treatment plan which includes specific achievable, behaviorally based and objective 	<p>Admission Criteria</p> <p>In order to receive Therapeutic Behavioral On Site services an infant or child 0-23 months must meet 1-5; age 24 months to 5 years must meet 1-4 AND 6</p> <ol style="list-style-type: none"> 1. The enrollee has received a psychological or psychiatric evaluation that supports an ICD-9-CM diagnosis of: 294.8, 294.9, 298.9, 300 through 305.9, 307.1, 307.23, 307.5 through 307.7, 308.0 through 312.4, and 312.81 through 314.9. 2. Services are recommended by a service planning team which always includes the family; the enrollee if appropriate; other persons who provide natural, informal support to the family; treatment providers; and representatives from other involved systems to the degree possible. 3. There is adequate evidence to indicate that the enrollee is at risk for a more intensive, restrictive and costly behavioral health placement; 4. Treatment at a lower level of care has been given serious consideration and there is adequate evidence to indicate that the enrollee's condition and functional level cannot be improved with a less intensive service. 5. Have experienced: <ol style="list-style-type: none"> a. Trauma such as physical abuse, sexual abuse, severe neglect, witnessed life threatening violence; or death of a caretaker; or failure to thrive (due to emotional or psychosocial causes, not solely medical issues) b. atypical development of temperament, or behavior that interferes with social interaction and relationship development. 6. Score in at least the moderate impairment range on behavior and functional rating scale developed for the specific age group. <p>Continued Stay Criteria (Must meet 1 through 4 and either 5 or 6)</p> <ol style="list-style-type: none"> 1. Enrollee continues to meet the criteria defined in above Admission Criteria. 2. There is a reasonable expectation that the enrollee will benefit from the continuation of Home/Community Services.

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Clinical services include the provision of a professional level therapeutic service that may include the teaching of problem solving skills, behavioral strategies, normalization activities and other treatment modalities that are determined to be medically necessary. These services should be designed to maximize strengths and reduce behavior problems or functional deficits stemming from the existence of a mental health disorder. Social services include interventions designed for the restoration, modification and maintenance of social, personal adjustment and basic living skills. Inherent in the concept of Therapeutic Behavioral On-Site Services is that they are developed and tailored specifically to meet individualized enrollee and family needs.</p> <p>Therapy Therapeutic behavioral therapy services include a clinical assessment of mental health, substance abuse or behavioral disorders to determine treatment needs. An assessment and implementation plan is created with the enrollee and his/her family to incorporate the child or adolescents' natural support system. These services also provide development, implementation, and monitoring of behavior programming for the enrollee as well as individual and family therapy as needed.</p> <p>Behavior Management Services Behavior management services provide an assessment of behavior problems, and functions of these problems and related skill deficits and assets. This assessment also identifies primary and other important caregiver skill deficits and assets related to the enrollee's behaviors and the interactions that will motivate, maintain or improve behavior. Behavior management services will develop and coordinate efforts for an individual behavior plan with measurable goals and objectives. The team will provide training for caregivers and others involved with the enrollee in the</p>	<p>treatment goals. Goals directly address the problems that resulted in the need for treatment and build on the enrollee's and his/her family's strengths. Treatment goals describe the roles that will be taken by all relevant participants in addition to the enrollee (e.g., family enrollees, school staff, if relevant, etc).</p> <p>4. Services are supervised by a qualified health professional:</p> <ol style="list-style-type: none"> Therapy services must be provided by a master's level practitioner supervised by a licensed practitioner of the healing arts. Behavior management services must be provided by a certified behavior analyst or certified associate behavioral analyst, working as a member of the enrollee's treatment team. On-site therapeutic support services must be provided, at a minimum, by a behavioral health technician supervised by a master's level practitioner. <p>5. There is documented commitment by the primary care givers (usually parent/guardian) to the therapeutic plan.</p> <p>6. The treatment team must include the enrollee and family, other persons who provide natural, informal support to the family system and the professionals involved in providing services. The child-specific plan for therapeutic behavioral on-site services must be based on a thorough assessment, with information from the enrollee and family, regarding needs, strengths and desired outcomes of services. When indicated by the assessment, and agreed to by the family, the plan must reflect referral to, and coordination with, other agencies and resources. It is recognized that involvement of the family in the treatment of the enrollee is necessary and appropriate. Provision of therapeutic behavioral on-site services with the family must clearly be directed toward meeting the identified treatment needs of the enrollee.</p>	<p>3. Treatment promotes developmentally appropriate behavior, activities, skills and social skills for the enrollee in his/her natural context through focusing on his/her individual strengths and needs.</p> <p>4. Techniques are employed in treatment that are time limited in nature.</p> <p>5. Appearance of new problems or symptoms which meet admission guidelines.</p> <p>6. Enrollee requires the continuation of a treatment support system while in the community until an effective family and community support network can be activated.</p> <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> Enrollee's identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis of one of the following ICD-9-CM codes: 294.8, 294.9, 295 through 298.9, 300 through 305.9, 307.1, 307.5 through 307.7, 308.0 through 312.4, and 312.81 through 314.9. Site of service is not where the primary problems or behaviors of the psychiatric diagnosis are manifested. Enrollee is simultaneously receiving similar therapeutic services of equal or greater intensity via another resource, <p>Discharge Criteria (Must meet <i>all</i> of the following):</p> <ol style="list-style-type: none"> Enrollee no longer meets Continued Stay Criteria. Enrollee meets the individualized discharge criteria. Within 45 days of admission to therapeutic behavioral on-site services, a plan must be developed with each enrollee and family, which contains specific discharge criteria. The discharge plan must be placed in the enrollee's clinical record.

implementation and monitoring of the behavior plan and revise as needed.

Therapeutic Support Services

Therapeutic support services must be related to the enrollee's treatment plan goals and objectives and must include one or more of the following:

- One-to-one supervision and intervention with the enrollee during therapeutic activities in accordance with the treatment plan;
- Skill training of the enrollee for restoration of those basic living and social skills necessary to function in the enrollee's own environment;
- Assistance to the enrollee and family in implementing the behavioral goals Identified through family counseling and development of the treatment plan.

Continued Stay Service Components

1. Treatment is in process of implementation.
2. Active and timely treatment is focused upon stabilizing or reversing symptoms for which treatment was initiated (or prescribed).
3. Interventions are consistent with the enrollee's risk factors and assessment.
4. Treatment plan and service hours have been adjusted to reflect the enrollee/family's progress.
5. Routine assessments and treatment progress updates are completed.
6. Enrollee and family, to the extent possible, are involved in treatment and discharge planning.

Continued Stay Documentation Requirement

Within six months of the original determination of eligibility for services and every six months thereafter, the members of the enrollee's treatment team must document that the enrollee continues to meet the eligibility criteria stated above. Services may be authorized for less than six months.

XII. MENTAL HEALTH 0-5
B. BEHAVIORAL DAY SERVICES

Service Description and Common Service Settings	Magellan Specifications	Magellan Utilization Management Guidelines
<p>Common Service Types:</p> <p>Behavioral Health Day services are appropriate early childhood therapeutic services for children age 24 months and older who are experiencing emotional problems and who meet the eligibility criteria described below. Services are designed to strengthen individual and family functioning, prevent more restrictive placement of children, and provide an integrated set of interventions to promote behavioral and emotional adjustment.</p> <p>Behavioral health day services are designed to enable enrollees to function successfully in the community in the least restrictive environment and to restore or enhance their ability for personal and social life management skills. This service is larger than group counseling, serving more recipients at one time with greater variety and clinical objectives. The primary function is to stabilize symptoms related to a behavioral health disorder in order to reduce or eliminate the need for more intensive and restrictive levels of care. This service is designed to provide transitional treatment after an acute episode or to provide a level of therapeutic intensity not possible in a traditional outpatient setting.</p> <p>Medicaid does not reimburse for basic childcare programs for developmental delays, preschool, or enrichment programs. The purpose of the behavioral health day services must be to address the young child's emotional problems.</p>	<p>Admission Service Components (Must meet all of the following):</p> <p>Behavioral health day services for children age 24 months through 5 years must meet the following requirements:</p> <ol style="list-style-type: none"> Services must be provided for a minimum of two to a maximum of four hours within the day. This need not be a continuous time period, but must be provided in one day. Therapeutic activities, as listed in the child's treatment plan, must be interwoven throughout the child's scheduled activities. The day treatment program must have a parent or caregiver component. At a minimum, there should be a monthly face-to-face contact at the day treatment center or at the child's home. If the provider is unable to involve the parent or caregiver or meet the requirement for the face-to-face contact, a telephone contact is allowable but is not reimbursable as part of day treatment. Written justification of why the face-to-face intervention could not occur must be provided in the child's medical record. The group size during therapeutic activities must not exceed ten (10) children. The behavioral health day services staff to child ratio during therapeutic activities may not exceed 1:5. Professional staff must be: <ol style="list-style-type: none"> Either licensed or certified at the independent practice level with experience in the treatment of children and adolescents; or Unlicensed and supervised at least weekly by an appropriately licensed professional, and Services provided must be within the therapist's scope of training. Complete biopsychosocial assessment including, but not limited to the enrollee's relevant history, 	<p>Admission Criteria (Must meet 1, 2,, 3, and 4)):</p> <p>In order to receive behavioral health day services, a child must be between 24 months through five years and:</p> <ol style="list-style-type: none"> Validated principal DSM-IV Axis I or II diagnosis as part of a complete multi-axial diagnostic evaluation. Claims for services rendered by community behavioral health services providers will be paid only for the following diagnosis codes: This diagnosis must be one of the following ICD-9-CM codes: 293.0 -298.9, 300.00-301.9, 302.7, 306.51-312.4, 312.81-314.9. Score in at least the moderate impairment range on a behavior and functional rating scale developed for this age group. Level of Stability - (Must meet all of the following): <ol style="list-style-type: none"> Risk to self, others or property is not imminent (although without treatment the enrollee's potential risk in these areas may be increased). The enrollee is medically stable and does not require a level of care that includes more intensive medical monitoring. When an Axis II diagnosis is involved, treatment is directed to the acute symptoms which place enrollee at risk and/or impair functioning. Degree of Impairment – (Must meet at least one of the following): <ol style="list-style-type: none"> Enrollee exhibits impairments in cognitive, affective, or behavioral abilities. Social/Interpersonal/Familial-- Enrollee exhibits impairment in social, interpersonal or familial functioning arising from a psychiatric disorder or a serious emotional disturbance which may indicate a need for outpatient psychotherapy to stabilize or reverse the condition. Vocational/Educational-Enrollee exhibits impairment in occupation or educational functioning arising from a psychiatric disorder or a serious emotional disturbance which may indicate a need for outpatient psychotherapy to stabilize or reverse the condition. <p>Continued Stay Criteria (Must meet 1 through 4, and either 5, 6, 7, or 8):</p> <ol style="list-style-type: none"> Validated DSM-IV Axis I or II diagnosis with exacerbation, or definable and discrete active symptoms. Axis II principal diagnosis must be accompanied by

	<p>previous treatment, current medical conditions (including medications), substance abuse history, personal strengths, lethality assessment and mental status.</p> <p>8. Development of an individualized, strengths-based, targeted, focused treatment plan directed toward the reduction or alleviation of the impairment that resulted in the enrollee seeking treatment. The plan must reflect the least restrictive, most efficacious treatment available.</p> <p>9. Development of specific, achievable, behaviorally based and objective treatment goals which directly address the problems that resulted in the enrollee seeking treatment.</p> <p>Continued Stay Service Components - (Must meet all of the following):</p> <ol style="list-style-type: none"> 1. Initial treatment plan has been formulated and is in the process of implementation. 2. Active and timely treatment is focused upon stabilizing or reversing symptoms which necessitated outpatient treatment. 3. Level of intervention is consistent with current enrollee risk factors for harm to self, others or property. 4. Treatment plan has been modified to reflect enrollee's progress and/or new information that has become available during the outpatient treatment. 5. Routine assessments and treatment progress updates are completed. 6. Enrollee and family, to the extent possible, are involved in treatment and discharge planning. 7. Natural community supports are identified. 	<p>acute symptoms which are the focus of treatment.</p> <ol style="list-style-type: none"> 2. There is a reasonable expectation that the enrollee will benefit from ongoing outpatient treatment. Benefit is defined as: demonstrated improvement in previous treatment as validated by objective tracking of progress toward treatment goals; and the enrollee's pre-morbid functioning suggests that he/she has not maximized his/her likely level of functioning. 3. Enrollee is making progress to the extent possible, toward goals and is benefiting from the treatment plan, as evidenced by the attainment of therapeutic rapport, lessening of symptoms and stabilization of psycho-social functioning through treatment planning, homework and session attendance. 4. There is significant opportunity for family (including the enrollee) cooperation and involvement in the treatment process, except where the involvement of family members other than the enrollee would be clinically counter-productive or legally prohibited. 5. As appropriate for the individual and circumstances, treatment promotes the enrollee's self-efficacy and independent functioning. 6. Current symptoms significantly impair the enrollee's ability to perform activities of daily living or significantly impair the enrollee's social, occupational or interpersonal functioning. 7. There is reasonable expectation, based on the enrollee's clinical history that withdrawal of treatment will result in the enrollee's decompensation or the recurrence of signs or symptoms. 8. Appearance of new problems which meet medical necessity for this level of care. <p>Exclusion Criteria (Any one of the following):</p> <ol style="list-style-type: none"> 1. Enrollee's identified problem is primarily social, financial, and/or medical (non-psychiatric) in the absence of a primary psychiatric diagnosis for one of the following ICD-9-CM codes: 290.0-298.9, 300.00-301.9, 302.7, 303-312.4, 312.81-314.9, 315.3, 315.31, 315.5, 315.8, and 315.9. 2. Substance abuse is the primary source of the enrollee's impairment in the absence of active symptoms. 3. Enrollee's condition has active components of significant risk to self or others or property such that a higher level of care is medically necessary. 4. Treatment is for autism, pervasive developmental delay, non-emotional or non-behavioral based developmental disability or mental retardation. 5. Enrollee is under age of 24 months of age.
